Let's stop HIV together.™

We are stopping HIV together, whether we are positive or negative. HIV does not define who we are.

HIV can affect anyone. Do your part by educating yourself and talking about HIV with your friends, families and loved ones. Help us prevent HIV by always protecting yourself, getting tested, and getting treatment, if needed.

Let's stop HIV together.™

Did you know that…

- More than a million people in the U.S. are living with HIV
- Approximately 50,000 Americans become infected with HIV every year
- 1 in 5 people living with HIV don't know they have it
- People who know they have HIV are more likely to use protection and less likely to infect others
- Finding out your HIV status early can help you live a longer, healthier life

Let's stop HIV together.™

We all have a role to play in preventing HIV whether we are HIV positive or negative, male or female, gay or straight.

Get the Facts and Share the Facts. Learn the basics about HIV by visiting our website (www.cdc.gov/ActAgainstAIDS). We must talk to each other about HIV and how we can prevent it.

Get Tested. It's easy. It's free, fast, and confidential. To find a testing site near you, go to hivtest.cdc.gov, call 1-800-CDC-INFO or text your ZIP code to KNOWIT (566948).

Get Involved. A little help goes a long way. You can make a difference.
