PREFACE

This is one of three volumes presenting final, definitive vital statistics of the United States, its Territories, and certain possessions for the year 1950. Their subject matter consists of vital events that occurred in the United States during the year—marriages, divorces, births, fetal deaths, infant deaths, and deaths among the general population.

The annual report is organized as follows:

Volume I. Analysis and Summary Tables With Supplemental Tables for Alaska, Hawaii, Puerto Rico, and Virgin Islands

Volume II. Marriage, Divorce, Natality, Fetal Mortality, and Infant Mortality Data

Volume III. Mortality Data

This organization of material represents a change from previous years. From 1900, when the annual collection of mortality statistics for the national death-registration area was established, through 1914, annual reports entitled "Mortality Statistics" were published in single volumes. Beginning with the first year of the national birth-registration area in 1915, the annual report was published in two volumes, "Mortality Statistics" and "Birth Statistics for the Birth Registration Area of the United States." Stillbirth statistics were added in 1922, and for the years through 1936 the two volumes were titled "Mortality Statistics" and "Birth, Stillbirth, and Infant Mortality Statistics."

Major changes in content and organization were made in the annual report for 1937. For the first time, all births and deaths reported in the United States were tabulated by place of residence, in addition to the usual tabulations by place of occurrence. In the new tabulations, births and deaths were assigned to the actual place of residence, no matter where they occurred. In view of the distinct uses of the new data by place of residence, the two types were issued in separate volumes: "Vital Statistics of the United States, Part I, Place of Occurrence" and "Vital Statistics of the United States, Part II, Place of Residence." During the period 1937 through 1949, when the report was issued in this form, the place-of-occurrence tables were gradually reduced, and the place-of-residence tables were expanded because residence data have greater value for most purposes. In the volumes for 1950, almost all natality and mortality tables are on a place-of-residence basis.

Statistics on marriages and divorces have been included in the annual reports beginning with 1946. All tabulations of marriages and divorces are by place of occurrence. Life tables for the United States have also been included beginning with 1946. Summary statistics of reported cases of certain notifiable diseases were first published in the annual report for 1949.

The year 1950 is of particular significance because of the availability of detailed population data obtained in the decennial census. Many vital rates for States, counties, and cities can be calculated for the census year or the period around it, which cannot be done at any other time. Also, for the country as a whole, population statistics are available on more characteristics and in greater detail. A special effort has been made in the annual report for 1950 to take advantage of the information from the population census. A considerable number of text and summary rate tables have been included in Volume I. In addition, the general tables in Volumes II and III provide detailed data which can be readily translated into meaningful rates by use of the published census figures. The full range of birth and death statistics tabulated for 1950 is indicated in the Guide to 1950 Tabulations in Volume I. The tabulations provide greater detail than is published in this report, particularly for individual counties and cities. All these data, as well as those for past years, can be made available upon request.

In using data from any of the three volumes, it is recommended that reference be made to the explanatory text in Volume I, which describes the sources, nature, and limitations of the statistics.

[1]Birth attended by "other and not specified" persons are not shown separately, but are included in total births. For the United States these births totaled 15,536 in 1950.
[2]It is assumed that all births in hospitals or institutions are attended by physicians.
[3]Includes data for Texarkana, Ark., only.
[4]Classified as urban under a special rule.
[5]Since this area is difficult to identify from information given on vital records, data may be understated or overstated.
[6]Includes data for Bristol, Tenn., only.
[7]Includes data for Texarkana, Tex., only.
[8]Independent cities have the same status as counties and are listed after counties.
[9]Those having populations of 10,000 or more include: Alexandria, Bristol, Charlottesville, Danville, Fredericksburg, Harrisonburg, Hopewell, Lynchburg, Martinsville, Newport News, Norfolk, Petersburg, Portsmouth, Richmond, Roanoke, South Norfolk, Staunton, Suffolk, Waynesboro, and Winchester.
[10]Includes data for Bristol, Va., only.
[11]Includes data for Bluefield, W. Va., only.

NOTES:

Urban places of 10,000 or more listed in this table include all incorporated places of 10,000 or more in 1950 and certain unincorporated areas classified as "urban" under special rules relating to population size and density. Areas classified as urban under these special rules are indicated by a footnote.

Certain cities are located in more than one county. In these cases, figures for the county include only the figures for that part of the city in the county. Total figures for each of these cities are shown under the county containing the larger proportion of the city's population. Totals for Amarillo, Tex., are shown under Potter County; Atlanta, Ga., under Fulton County; Aurora, Colo., under Adams County; Bethlehem, Pa., under Northampton County; Centralia, Ill., under Marion County; College Park, Ga., under Fulton County; Collinsville, Ill., under Madison County; Eau Claire, Wis., under Eau Claire County; Elgin, Ill., under Kane County; Ellwood City, Pa., under Lawrence County; Fostoria, Ohio, under Seneca County; Hannibal, Mo., under Marion County; Huntington, W. Va., under Cabell County; Joplin, Mo., under Jasper County; Kansas City, Mo., under Jackson County; Pocatello, Idaho, under Bannock County; Rocky Mount, N. C., under Nash County; St. Cloud, Minn., under Stearns County; Salem, Oreg., under Marion County; Sikeston, Mo., under Scott County; Streator, Ill., under La Salle County; Takoma Park, Md., under Montgomery County; Watertown, Wis., under Jefferson County; Weirton, W. Va., under Hancock County; and Youngstown, Ohio, under Mahoning County. Likewise, total figures for Yellowstone National Park are shown under Wyoming.

[1]Births attended by "other and not specified" persons are not shown separately, but are included in total births. For the United States these births total 15,536 in 1950.
[2]It is assumed that all births in hospitals or institutions are attended by physicians.
[3]Per 1,000 population in each specified group, enumerated as of April 1.
[4]Per 1,000 live births in each specified group.
[5]Rate not computed.
[6]Includes Arlington County classified as urban under a special rule.

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in Standard Metropolitan Areas as defined by the Bureau of the Census, except in New England where the counties are those in the Metropolitan State Economic Areas, also as defined by the Bureau of the Census. The category "nonmetropolitan counties" includes all other counties in the State. The "urban-rural" classification is based on the "old" (1940) definition of the Bureau of the Census, in which "urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules.. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."

[1]Unit of residence is defined as the individual urban place, or the rural area of the county, of which the mother was a resident. Urban places include every incorporated place having a population of 2,500 or more in 1950, as well as certain unincorporated places classified as "urban" according to special rules. For full discussion of residence allocation rules, see text in Volume I, "Vital Statistics of the United States, 1950."

[1]Figures for age of mother "not stated" and birth order "not stated" are not shown separately, but are included in "totals." For the United States in 1950, age of mother "not stated" totaled 5,562, and birth order "not stated" totaled 104,044.
[2]Massachusetts did not require the reporting of birth order. Birth order data shown are for births in other States to residents of Massachusetts.
[3]Includes Arlington County classified as urban under a special rule.

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in Standard Metropolitan Areas as defined by the Bureau of the Census, except in New England where the counties are those in the Metropolitan State Economic Areas, also as defined by the Bureau of the Census. The category "nonmetropolitan counties" includes all other counties in the State. The "urban-rural" classification is based on the "old" (1940) definition of the Bureau of the Census, in which "urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."

Table 22A. Live Births by Age of Mother, Birth Order, Sex of Child, Race, and Nativity of White Mother: United States, 1950

(Birth order refers to number of children born alive to mother. Births which occurred in Massachusetts are included in the "Not stated" classification for birth order because this State did not require reporting on this item)

Table 22B. Live Births by Age of Mother, Birth Order, Race, and Nativity of White Mother: Each State, 1950

(By place of residence. Birth order refers to number of children born alive to mother. Births to white mothers whose nativity was not stated are not shown separately, but are included in "White." "Negro" is shown separately only in those States where the total number of births so classified was 100 or more. "Other races" in these States may be obtained by subtracting "Negro" from "Nonwhite")

[1]Unit of residence is defined as the individual urban place, or the rural area of the county, of which the mother was a resident. Urban places include every incorporated place having a population of 2,500 or more in 1950, as well as certain unincorporated places classified as "urban" according to special rules. For full discussion of residence allocation rules, see text in Volume 1, "Vital Statistics of the United States, 1950."

[2]The effect of reporting requirements in Rhode Island was to limit data almost entirely to fetal deaths of 6 months gestation or more.

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in Standard Metropolitan Areas as defined by the Bureau of the Census, except in New England where the counties are those in the Metropolitan State Economic Areas, also as defined by the Bureau of the Census. The category "nonmetropolitan counties" includes all other counties in the State. The "urban-rural" classification is based on the "old" (1940) definition of the Bureau of the Census, in which "urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."

Table 32. Fetal Deaths by Birth Order (Including Fetal Deaths) and Race: United States and Each State, 1950

(By place of residence. Includes only fetal deaths for which the period of gestation was given as 20 weeks (or 5 months) or more, or was not stated. Birth order refers to number of children ever born to mother, including fetal deaths. Fetal deaths which occurred in Massachusetts are included in the "Not stated" classification for birth order because this State did not require reporting on the item)

Table 33. Fetal Deaths by Age of Mother, Birth Order (Including Fetal Deaths), Race, and Sex of Child: United States, 1950

(Includes only fetal deaths for which the period of gestation was given as 20 weeks (or 5 months) or more, or was not stated. Birth order refers to number of children ever born to mother, including fetal deaths. Fetal deaths which occurred in Massachusetts are included in the "Not stated" classification for birth order because this State did not require reporting on the item)

[1]Fetal deaths for which period of gestation was not stated (Group IV) are not shown separately, but are included in this group.
[2]Fetal deaths attended by "other and not specified" persons are not shown separately, but are included in total.
[3]It is assumed that all fetal deaths in hospitals are attended by physicians.
[4]Period of gestation reports in months allocated to gestation interval in weeks as follows: "5 and 6 months" to "20-27 weeks"; "7 months or more" to "28 weeks or more." Colorado, Georgia, Louisiana (for part of year), Oklahoma, and Rhode Island requested reporting of gestational age in months.
[5]Connecticut required reporting of fetal deaths of not less than 28 weeks gestation or measuring at least 13.8 inches.
[6]Massachusetts did not require the reporting of period of gestation. Gestational age data shown are for fetal deaths in other States to residents of Massachusetts.
[7]The effect of reporting requirements in Rhode Island was to limit data almost entirely to fetal deaths of 6 months gestation or more.
[8]Vermont required reporting of fetal deaths of 5½ months gestation or more.

Table 35. Fetal Deaths by Birth Weight, Race, and Period of Gestation: United States and Each State, 1950

(By place of residence. Includes only fetal deaths for which the period of gestation was given as 20 weeks (or 5 months) or more, or was not stated. Birth weight data for fetal deaths in several States, and period of gestation data for fetal deaths in Massachusetts, were not available for either the entire year or for most of the year. In these cases, the fetal deaths are included in the "Not stated" classification for the items)

[1]Period of gestation reports in months allocated to gestation interval in weeks as follows: "5 and 6 months" to "20-27 weeks"; "7 and 8 months" to "28-35 weeks"; "9 months" to "37-42 weeks"; "10 months" to "over 42 weeks." Colorado, Georgia, Louisiana (for part of year), Oklahoma, and Rhode Island requested reporting of gestational age in months.

[2]The equivalents of the gram weights in terms of pounds and ounces are as follows:

500 grams or less = 1 lb. 1 oz. or less
501-1,000 grams = 1 lb. 2 oz.-2 lbs. 3 oz.
1,001-1,500 grams = 2 lbs. 4 oz.-3 lbs. 4 oz.
1,501-2,000 grams = 3 lbs. 5 oz.-4 lbs. 6 oz.
2,001-2,500 grams = 4 lbs. 7 oz.-5 lbs. 8 oz.
2,501-3,000 grams = 5 lbs. 9 oz.-6 lbs. 9 oz.
3,001-3,500 grams = 6 lbs. 10 oz.-7 lbs. 11 oz.
3,501-4,000 grams = 7 lbs. 12 oz.-8 lbs. 13 oz.
4,001-4,500 grams = 8 lbs. 14 oz.-9 lbs. 14 oz.
4,501 grams or more = 9 lbs. 15 oz. or more

[3]Colorado did not require the reporting of birth weight. Birth weight data shown are for fetal deaths in other States to residents of Colorado.

[4]Connecticut required reporting of fetal deaths of not less than 26 weeks gestation or measuring at least 13.8 inches. Birth weight information not available for fetal deaths occurring in Connecticut. Data on birth weight shown are for fetal deaths in other States to residents of Connecticut.

[5]Georgia did not require the reporting of birth weight. Birth weight data shown are for fetal deaths in other States to residents of Georgia.

[6]Louisiana did not require the reporting of birth weight until the end of the year.

[7]Massachusetts did not require the reporting of birth weight or period of gestation. Birth weight and period of gestation data shown are for fetal deaths in other States to residents of Massachusetts.

[8]The effect of reporting requirements in Rhode Island was to limit data almost entirely to fetal deaths of 6 months gestation or more.

[9]Vermont required reporting of fetal deaths of 5½ months gestation or more.

Table 36. Fetal Deaths by Birth Weight, Race, Period of Gestation, Sex, and Plurality: United States, 1950

(Includes only fetal deaths for which the period of gestation was given as 20 weeks (or 5 months) or more, or was not stated. For number of fetal deaths in each State for which birth weight and/or period of gestation was "Not stated," see table 35. In the table below, these fetal deaths are included in the "Not stated" classification. For discussion of special problems arising from large proportion of "Not stated" birth weights, see text, Volume I, "Vital Statistics of the United States, 1950")

"urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."
