PREFACE

This is one of three volumes presenting final, definitive vital statistics of the United States, its Territories, and certain possessions for the year 1950. Their subject matter consists of vital events that occurred in the United States during the year—marriages, divorces, births, fetal deaths, infant deaths, and deaths among the general population.

The annual report is organized as follows:

Volume I. Analysis and Summary Tables With Supplemental Tables for Alaska, Hawaii, Puerto Rico, and Virgin Islands

Volume II. Marriage, Divorce, Natality, Fetal Mortality, and Infant Mortality Data

Volume III. Mortality Data

This organization of material represents a change from previous years. From 1900, when the annual collection of mortality statistics for the national death-registration area was established, through 1914, annual reports entitled "Mortality Statistics" were published in single volumes. Beginning with the first year of the national birth-registration area in 1915, the annual report was published in two volumes, "Mortality Statistics" and "Birth Statistics for the Birth Registration Area of the United States." Stillbirth Statistics were added in 1922, and for the years through 1936 the two volumes were titled "Mortality Statistics" and "Birth, Stillbirth, and Infant Mortality Statistics."

Major changes in content and organization were made in the annual report for 1937. For the first time, all births and deaths reported in the United States were tabulated by place of residence, in addition to the usual tabulations by place of occurrence. In the new tabulations, births and deaths were assigned to the actual place of residence, no matter where they occurred. In view of the distinct uses of the new data by place of residence, the two types were issued in separate volumes: "Vital Statistics of the United States, Part I, Place of Occurrence" and "Vital Statistics of the United States, Part II, Place of Residence." During the period 1937 through 1949, when the report was issued in this form, the place-of-occurrence tables were gradually reduced, and the place-of-residence tables were expanded because residence data have greater value for most purposes. In the volumes for 1950, almost all natality and mortality tables are on a place-of-residence basis.

Statistics on marriages and divorces have been included in the annual reports beginning with 1946. All tabulations of marriages and divorces are by place of occurrence. Life tables for the United States have also been included beginning with 1946. Summary statistics of reported cases of certain notifiable diseases were first published in the annual report for 1949.

The year 1950 is of particular significance because of the availability of detailed population data obtained in the decennial census. Many vital rates for States, counties, and cities can be calculated for the census year or the period around it, which cannot be done at any other time. Also, for the country as a whole, population statistics are available on more characteristics and in greater detail. A special effort has been made in the annual report for 1950 to take advantage of the information from the population census. A considerable number of text and summary rate tables have been included in Volume I. In addition, the general tables in Volumes II and III provide detailed data which can be readily translated into meaningful rates by use of the published census figures. The full range of birth and death statistics tabulated for 1950 is indicated in the Guide to 1950 Tabulations in Volume I. The tabulations provide greater detail than is published in this report, particularly for individual counties and cities. All these data, as well as those for past years, can be made available upon request.

In using data from any of the three volumes, it is recommended that reference be made to the explanatory text in Volume I, which describes the sources, nature, and limitations of the statistics.

[1] Unit of residence is defined as the individual urban place, or the rural area of the county, of which the decedent was a resident. Urban places include every incorporated place having a population of 2,500 or more in 1950, as well as certain unincorporated places classified as "urban" according to special rules. For full discussion of residence allocation rules, see text in Volume I, "Vital Statistics of the United States, 1950."

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in Standard Metropolitan Areas as defined by the Bureau of the Census, except in New England where the counties are those in the Metropolitan State Economic Areas, also as defined by the Bureau of the Census. The category "nonmetropolitan counties" includes all other counties in the State. The "urban-rural" classification is based on the "old" (1940) definition of the Bureau of the Census, in which "urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in Standard Metropolitan Areas as defined by the Bureau of the Census, except in New England where the counties are those in the Metropolitan State Economic Areas, also as defined by the Bureau of the Census. The category "nonmetropolitan counties" includes all other counties in the State. The "urban-rural" classification is based on the "old" (1940) definition of the Bureau of the Census, in which

"urban" consists of incorporated places of 2,500 population or more in the 1950 Census and a number of other places defined as urban under special rules. For further discussion of the "metropolitan-nonmetropolitan" and "urban-rural" classifications, see text in Volume I, "Vital Statistics of the United States, 1950."

NOTES:

Urban places of 10,000 or more listed in this table include all incorporated places of 10,000 or more in 1950 and certain unincorporated areas classified as "urban" under special rules relating to population size and density. Areas classified as urban under these special rules are indicated by a footnote.

Certain cities are located in more than one county. In these cases, figures for the county include only the figures for that part of the city in the county. Total figures for each of these cities are shown under the county containing the larger proportion of the city's population. Totals for Amarillo, Tex., are shown under Potter County;
