75 million US adults have hypertension

But many are not aware or treated (hiding in plain sight) and **only about half** have it controlled

75M
Have high blood pressure

64M
Aware

57M
Treated

41M
Controlled

SOURCE: CDC/NCHS, National Health and Nutrition Examination Survey, 2013-2014.
Note: Data included adults ages 18 or older.
