West Nile virus neuroinvasive disease incidence reported to ArboNET, by county, United States, 2001

West Nile virus neuroinvasive disease incidence maps present data reported by state and local health departments to CDC's ArboNET surveillance system. This map shows the incidence of human neuroinvasive disease (e.g., meningitis, encephalitis, or acute flaccid paralysis) by county for 2001 with shading ranging from 0.01-0.99, 1.0-2.49, 2.50-9.99, and greater than 10.0 per 100,000 population.

Counties from the following states reported neuroinvasive disease cases to ArboNET in 2001: Alabama, Connecticut, Florida, Georgia, Louisiana, Maryland, Massachusetts, New Jersey, New York, and Pennsylvania.
