Health Communication Science Digest

Office of the Associate Director for Communication

May 2013 -- Vol. 4, Issue 5e

To enhance awareness of emerging health communication and marketing scientific knowledge, the Science Team in the Office of the Associate Director for Communication at the Centers for Disease Control and Prevention frequently undertakes an extensive scan of the expert literature. Recent publications with particular relevance for the public health communication community are detailed here.

Abstracts and PDF copies of most articles are available through the DOI hyperlink included with each citation. In some cases, however, the DOI hyperlink will not work or the publisher charges for the article. The help of your local library staff may be required in such circumstances to secure access to some publications.

Please share your comments or questions with us. Contact HCSD@cdc.gov.

Articles of Interest

- Ammann, R., Vandelanotte, C., de Vries, H., & Mummery, W. K. (2013). Can a website-delivered computer-tailored physical activity intervention be acceptable, usable, and effective for older people? *Health Education & Behavior*, *40*(2), 160-170. doi: 10.1177/1090198112461791
- Baek, T. H., Shen, L., & Reid, L. N. (2013). Effects of message framing in anti-binge drinking PSAs: The moderating role of counterfactual thinking. *Journal of Health Communication*, *18*(4), 442-458. doi: 10.1080/10810730.2012.743621
- Ballew, P., Castro, S., Claus, J., Kittur, N., Brennan, L., & Brownson, R. C. (2013). Developing web-based training for public health practitioners: What can we learn from a review of five disciplines? *Health Education Research*, *28*(2), 276-287. doi: 10.1093/her/cys098
- Baños, R. M., Cebolla, A., Oliver, E., Alcañiz, M., & Botella, C. (2013). Efficacy and acceptability of an Internet platform to improve the learning of nutritional knowledge in children: The ETIOBE Mates. *Health Education Research*, *28*(2), 234-248. doi: 10.1093/her/cys044
