Managing Asthma in Schools—What Have We Learned?

Read this special issue, co-sponsored by CDC and NHLBI, to learn how to:

- Increase asthma action plans and orders in your school.
- Monitor asthma plans, orders, and medications in the health room.
- Save time by identifying students with poorly controlled asthma, rather than conducting surveys to identify undetected asthma.
- Track and coordinate care for students with poorly controlled asthma.
- Secure administrative support for school-based asthma programs.
- Conduct professional development for staff.
- And more!
