Profiles 2012 - HIV, STD, and Pregnancy Prevention
San Francisco Secondary Schools

The **School Health Profiles (Profiles)** is a system of surveys assessing school health policies and practices in states, territories, and large urban school districts. Profiles surveys are conducted biennially among representative samples of middle and high school principals and lead health education teachers.

Health Education	Among Cities* Median Range	San Francisco %
Percentage of schools that tried to increase student knowledge on HIV prevention in a required course	94.2 (54.2 – 100.0)	**96.3**
