

# Pregnancy Prevention

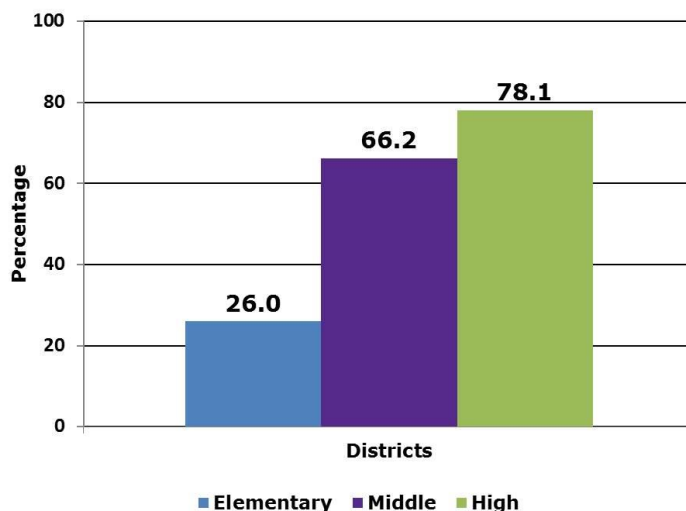

**About SHPPS:** SHPPS is a national survey periodically conducted to assess school health policies and practices at the state, district, school, and classroom levels. SHPPS was conducted in 1994, 2000, and 2006. The 2012 study collected data at the state and district levels only. School- and classroom-level data collection will take place in 2014.

## Health Education

- 75.5% of states and 44.3% of districts provided funding for professional development or offered professional development to those who teach health education on pregnancy prevention during the 2 years before the study.

Percentage of States Providing Assistance to Districts or Schools on Pregnancy Prevention Education	
Type of Assistance	Districts
Developed, revised, or assisted in developing model policies, policy guidance, or other materials*	66.7
Distributed or provided model policies, policy guidance, or other materials*	74.5
Provided technical assistance†	88.2
* During the 2 years before the study † During the 12 months before the study	

Percentage of Districts that Required Teaching About Pregnancy Prevention at Each School Level

## Mental Health and Social Services

- 22.1% of districts had arrangements with any organizations or healthcare professionals to provide referrals for child care for teen mothers at other sites not on school property.

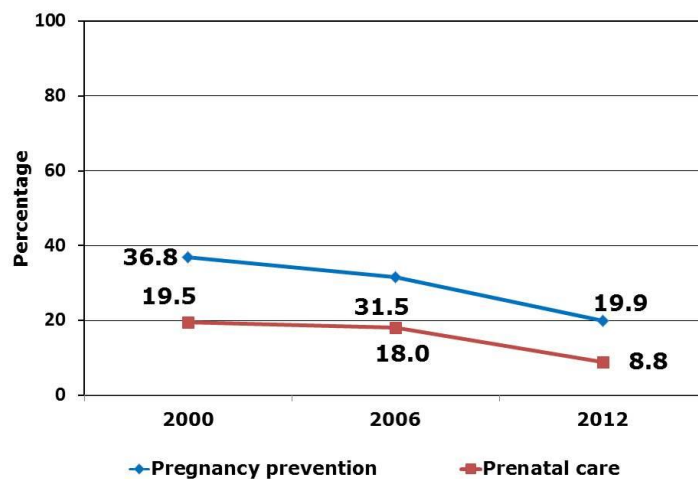

Percentage of States and Districts That Provided Funding for Professional Development or Offered Professional Development to Mental Health or Social Services Staff on Pregnancy-Related Topics*		
Topic	States	Districts
Child care options for teen mothers	38.6	18.4
Pregnancy prevention	60.0	32.3
*During the 2 years before the study.		

## Health Services

Percentage of Districts That Had Adopted a Policy Stating That Schools Will Provide Pregnancy-Related Services	
Service	Districts
Contraceptives	3.4
Pregnancy prevention (in one-on-one or small-group sessions)	30.7
Prenatal care referrals	18.5
Referrals for child care options for teen mothers	17.6

Percentage of Districts That Had Arrangements with Any Organizations or Healthcare Professionals to Provide Pregnancy-Related Services At Other Sites Not on School Property	
Service	Districts
Contraceptives	4.3
Pregnancy prevention (in one-on-one or small-group sessions)	7.0
Prenatal care or prenatal care referrals	6.1

Percentage of Districts That Provided Funding for Professional Development or Offered Professional Development to School Nurses—2000, 2006, and 2012<sup>1</sup>

Percentage of States and Districts That Provided Funding for Professional Development or Offered Professional Development to School Nurses on Pregnancy-Related Topics*		
Topic	States	Districts
Child care options for teen mothers	22.4	9.6
Contraceptives	38.0	9.7
Pregnancy prevention	61.2	19.9
Prenatal care	32.0	8.8

\*During the 2 years before the study.

## Faculty and Staff Health Promotion

- During the 12 months before the study, 2.7% of districts provided funding for pre- or post-natal education for faculty and staff.

<sup>1</sup>Regression analyses were performed that took all available years of data into account. To account for multiple comparisons, selected changes are included only if the p-value from the trend analysis was less than .01, and either the difference between the two endpoints (2000 and 2012) was greater than 10 percentage points or the 2012 estimate increased by at least a factor of two or decreased by at least half as compared to the 2000 estimate.
