To: NIOSH Docket Office (CDC)
Subject: 034-A - Revision of Open-Circuit, Self Contained Breathing Apparatus (SCBA) End of Service Time Indicator (EOSTI) Performance Requirement

Gentlemen and ladies,

I would like to on behalf of fire engineering magazine and myself as a retired fire chief with over 25 years of experience strongly endorse the adoption of this recommendation. This recommendation will allow for far greater levels of safety for all firefighters currently using self-contained breathing apparatus.

Respectfully submitted by
Bobby Halton
