Comments

To us it makes no sense that the bottles would have to be bought or replaced and have the same manufacturers name on the bottles as the air pack. We are told this will void the warranty if not purchased from Scott.

To my knowledge Scott has another vendor manufacture the bottles for them.

We are in a situation where we are replacing 20 bottles this year and a saving of approx 200.00 per bottle adds up to a tidy sum for an already tight budget.

In our opinion if the bottle passes the NIOSH testing as well as all tests why would we be held hostage and pay more for our bottles for replacement or on a new pack that we are looking at purchasing
