I find the NIOSH reports very informative and use them as a training tool for my call firefighters. Once I receive the report via email I forward the report to all members with notes and comments. The biggest complaint I have have is the lack of most firefighters interest in these reports in my own combination department. I wish there was a way for these reports to sent to all fire departments. I dont think most firefighters know they are available. I also like honesty of the reports and they never seen bias against call or volunteer firefighters.
