Dear Dr. Niemeier:

This is in response to your letters of January 10 and January 20, requesting existing information relevant to implementing the Workers' Family Protection Act. Unfortunately our agency does not have any reports, studies, case histories, voluntary guidance, statutes, or regulations regarding the problem of contamination of workers' homes by hazardous chemicals and substances transported from the workplace.

Thank you for your interest in Kentucky Occupational Safety and Health Program. If you have any further questions, please feel free to contact me.

Sincerely,

Mrs. Carol M. Palmore
Secretary of Labor
