USA

Comments

- 1-would incorporate actual safe lifting of patients into the video, performed by staff.
- 2-Remove the music background from the video, it is distracting.
- 3-Discuss the algorithms in more detail.
- 4-This document would also benefit nurses aides.
- 5-May need to mention restraints when describing the geri chair, if the patient does not have the capability to get out of a reclined chair this is considered a restraint and students need to know this.
- 5-To stimulate though you may consider some pre and post questions
