Subject: PUBLIC OPINION

Dear Docket Officer,

I feel that every individual has a different reaction to everything, including radiation exposure. Some may be able to tolerate a higher dose than others. I feel that if someone develops cancerous tumors or leukemia from radiation exposure they should be compensated regardless of their amount of exposure. I respectfully request that radiation workers who developed cancer, and their families, are compensated. I lost my father to leukemia when I was 13 years old. It's terrible to grow up without a father and it was difficult for my mother as well. He was a young man who will never meet his grandchildren and great grandchildren. Thank you for taking the time to listen to my opinion.

Sincerely,

Janet McKirahan
