

is seeking to collect information on family engagement on a more frequent basis. HHS proposes that in addition to annual reporting, Home Visiting Program grantees will report quarterly on the existing family engagement metrics they are required to submit. These metrics are currently defined as the number of participants currently receiving services who have completed the program, who stopped services before completion, and other participants.

(4) *Staff Recruitment and Retention:* HHS is seeking to collect information related to the number of home visitors and other support staff who are currently employed directly or through sub-contracted grant funds. Staff recruitment and retention is a key component to the successful delivery of home visiting services and to maximizing the number of cases each local implementing agency can reach. Home Visiting Program grantees will report quarterly the actual number of staff and current vacancies in three categories: Home visitors, program administration, and support staff.

Corrective Action Benchmark Data is made up of one category of data: *Corrective Action Constructs*. Home Visiting Program grantees who have not shown improvement in four of six Benchmark areas after 3 years of grant funding are statutorily required to complete corrective action plans, subject to approval by the Secretary, in order to show how they plan to achieve improvement in deficient areas. Currently HHS collects information related to selected Benchmark areas from all Home Visiting Program grantees on an annual basis (OMB-0915-0357, expiration 7/31/2017). In order to monitor grantee improvement toward meeting these Benchmarks, HHS is seeking to collect information from grantees on implementation of their corrective action plans on a more frequent basis. HHS proposes that grantees with corrective action plans report on a quarterly basis for the Benchmark measures for which they were deemed as not showing improvement. It is estimated that approximately 15 grantees per year will require this more frequent reporting.

This information will be used to monitor and provide continued oversight for grantee performance and to target technical assistance resources to grantees.

Likely Respondents: Home Visiting Program grantees.
