

It may take
more energy,
but it's
worth it.

— JUNE, BREAST CANCER SURVIVOR

June, who was born with cerebral palsy, knows first-hand that we're not immune to breast cancer just because we live with a disability. She tells us to ask for an accessible screening and not let the system decide what's best.

Finding her cancer early allowed June to go on with her life. Screening allowed her to take control. If you are between the ages of 40 to 49, talk to your doctor about when and how often you should have a screening mammogram.

If you are between the ages of 50 to 74, be sure to have a screening mammogram every two years.

BREAST CANCER SCREENING THE RIGHT TO KNOW
