

Extended sets workgroup

Friday morning discussion

Summary of decisions

- **Purpose equalisation of opportunities + prevalence**
- **Three areas of extensions –**
 - 1) expand on the number of domains (emotional functioning, cognition, pain and fatigue)
 - 2) adding supplementary items and revisit some decisions on functioning items (whether 1 or two or more Qs); issues of onset, etc.
 - 3) environmental issues – within domains and separately
- **look at different ways to address participation**
- **Coordination to other groups working on similar activities.**
- **Members of group to rethink commitments – think of ways of communicating.**

Tasks for extended sets workgroup

- 1. Write up decisions from 7th meeting – summary – Margie**
- 2. set up tables for submission of information – Marijke and Margie**
- 3. Q review task –**
 - What to review – decide today (EUROSTAT – Marijke)**
 - What has already been reviewed -**
 - Calling for information -**
 - Integrating information -**
 - Setting out categories of information required – type of Qs, testing done, results (or where can be consulted), response options, etc.)**

- 4. statistical analysis – IRT, regression analysis, etc.**
 - what are major questions
 - what is already done – review and tabulate results
 - what needs to be done
- 5. compiling results from cognitive testing – WG, WHO/UNESCAP, EUROSTAT, BI,**
- 6. compile sets as per decisions of 7th meeting starting with longer short set together with criteria for selection and how did it (e.g. based on findings)**
- 7. relationship between short and extended sets – how to test this further**
- 8. testing protocols and way forward.**

Sub-Groups

- 1. reviewing and listing Questions**
- 2. statistical analysis – international and national**
- 3. compiling sets**

Communication

- 1. face to face meeting –**
 - 1. ? Funding**
 - 2. ?where,**
 - 3. ?when**
- 2. Yahoo group – for communication**
- 3. More frequent e-mails**
