Recent changes in childbearing in the United States

- Declines in U.S. births slowed in 2012
- First births and birth rates dropping for teens and increased for women in their 30s
- Teen birth rates are down steeply for all women—especially Hispanic—and in most states, since 2007
- Unmarried mothers are more likely to be older and cohabiting

Births leveled off in 2012 after recent declines
