CDR Kenny Fent, PhD, CIH
National Firefighter Registry
National Institute for Occupational Safety and Health

Dear Kenny,

On behalf of the Fire Safety Research Institute at UL Research Institutes I would like to provide our full support for the National Firefighter Registry. Through our research and partnership with NIOSH through the years we know we share the goals of protecting the fire service from developing cancer, lessening the impact of cancer, developing new health and safety measures to keep future firefighters safe and improving the understanding of cancer risk among all groups within the fire service. We will dedicate resources to support recruitment for firefighters to join the NFR and support other tactics that will enable this tool to fulfill its critical mission. Please do not hesitate to reach out for any additional support you need.

Sincerely,

A handwritten signature in black ink, appearing to read 'SK', written in a cursive style.

Steve Kerber
