Dear Sir:

As a practicing Infection Control Professional, I would like to express our support for the proposed rule on respiratory protective devices (42 CFR Part 84 Fed Register Vol.59, No.99). I understand that this proposal enables manufacturers to produce a broader range of certified respirators which provide the necessary level of protection. This crucial first step in requiring a clear set of performance standards and addressing the health care setting should provide a reliable method for evaluating the necessary respirators. Thank you.

Sincerely,

Barbara Haner, RN  
Director Infection Control
