500 W. Hospital Rd.
French Camp, CA 95231
USA

Comments

The presentation is very good about identifying risks for nurses, but I think it could improve by adding suggestions for "how" to actually move a patient. Perhaps that is in the algorithms, which either didn't come with the downloaded file or I couldn't open. I think it's wonderful though that someone (with some authority) is finally saying that being told to use body mechanics is not going to necessarily help nurses move patients safely.
