Subject: Re: (no subject)

hello karen, sorry for being so vague in my email, my name john fassari, i am a disabled new york city fire officer, many of my co-workers, including myself have fallen ill from our participation operating at wtc, just to quickly tell you my own experience, i have non hodgkins lymphoma, a rare blood disorder, which has no cure, many believe that operating at wtc is why i am sick today, many of my friends/members of the fdny are no longer with us today to tell others of why they have gone to an early grave. if i can i would like to participate in the wtchp-stac inquiry, hopefully shedding light on this matter!

repectfully,
john fassari (retired lieut. fdny)
