Subject: special COHORT statis for nevada test site workers

Dear sir

Because most former nucelair weapons workers have been far less than informed about the procedures and standards of the energy workers compensation plan --THE ACT-- we have only reasonently found out of what rules apply.

I only yesterday diiscover the sec 3626 of --THE ACT--where as it states that groups may apply for special COHORT statis.

I also noticed that the cut off date is aug 26th 2002. monday.

I would like to request that you extend this dead line so that my attorney has time to explore such oppinions of oppertunity,.If you will not do this then please consider this email as a request by the nevada test site workers to be covered by SEC 3626 of the ACT.

I am requesting this on behalf of all nevada test site workers not just myself. I feel we should qualify because The Dept of Energy kept very poor if any radation exposure records. the Dept of energy has also admitted in public and in the news that they had been less than honest in keeping such records and as of this time can not produce any records for thr majority of the people who worked their.

As to the NIOSH reconstruction of DOSE.from what i have read , although their is no concesouse as to how it should be done most so called experst agree that we should get nothing. that is hardly the fair and understanding and compasionate review we were promised by the president the congress and senate.and it is contradictory to the entire format of this entire program.

i would like an acknowledgement of this email.and i would also like to know if #1 you would consider extending the date of aug 26th 2002 or if you would consider this email as a legal request that has conformed to your aug thew 26th dead line.
