

Data table for Figure 1. Percentage of adults who used the Internet in the past 12 months to look for health or medical information, by sex, age, and race and Hispanic origin: United States, July–December 2022

Selected characteristic	Percent (95% confidence interval)	Standard error
Total	58.5 (57.4–59.6)	0.54
Sex		
Men	53.5 (51.9–55.0)	0.77
Women	63.3 (61.9–64.6)	0.70
Age group (years)		
18–29.	62.7 (59.9–65.3)	1.36
30–44.	67.2 (65.4–69.0)	0.91
45–64.	58.2 (56.4–60.0)	0.90
65–74.	51.1 (48.8–53.4)	1.16
75 and older.	36.3 (33.8–38.9)	1.29
Race and Hispanic origin		
American Indian and Alaska Native, non-Hispanic	56.1 (43.8–67.9)	5.92
Asian, non-Hispanic.	60.1 (55.9–64.1)	2.06
Black, non-Hispanic.	49.0 (45.9–52.2)	1.56
White, non-Hispanic	63.4 (62.1–64.7)	0.66
Hispanic.	46.2 (43.6–48.8)	1.30

NOTES: Estimates are based on "yes" responses to the option, "To look for health or medical information," when asked the question, "During the past 12 months, have you used the Internet for any of the following reasons?" Adults who did not use the Internet were counted as not looking up health or medical information. Adults of Hispanic origin may be of any race. Adults of other and multiple races are not shown. Estimates are based on household interviews of a sample of the U.S. civilian noninstitutionalized population.

Data table for Figure 2. Percentage of adults who used the Internet in the past 12 months to communicate with a doctor or doctor’s office, by sex, age, and race and Hispanic origin: United States, July–December 2022

Selected characteristic	Percent (95% confidence interval)	Standard error
Total	41.5 (40.4–42.6)	0.56
Sex		
Men	35.6 (34.1–37.0)	0.74
Women	47.2 (45.7–48.7)	0.75
Age group (years)		
18–29.	41.5 (38.8–44.2)	1.35
30–44.	47.7 (45.7–49.7)	0.99
45–64.	43.2 (41.5–45.0)	0.87
65–74.	37.2 (35.0–39.6)	1.15
75 and older.	24.3 (22.1–26.6)	1.12
Race and Hispanic origin		
American Indian and Alaska Native, non-Hispanic	30.5 (21.5–40.8)	4.71
Asian, non-Hispanic.	42.3 (38.1–46.6)	2.13
Black, non-Hispanic.	36.7 (33.7–39.7)	1.50
White, non-Hispanic	45.0 (43.5–46.4)	0.73
Hispanic.	32.0 (29.6–34.5)	1.22

NOTES: Estimates are based on “yes” responses to the option, “To communicate with a doctor or doctor’s office,” when asked the question, “During the past 12 months, have you used the Internet for any of the following reasons?” Adults who did not use the Internet were counted as not communicating with a doctor or doctor’s office. Adults of Hispanic origin may be of any race. Adults of other and multiple races are not shown. Estimates are based on household interviews of a sample of the U.S. civilian noninstitutionalized population.

Data table for Figure 3. Percentage of adults who used the Internet in the past 12 months to look up medical test results, by sex, age, and race and Hispanic origin: United States, July–December 2022

Selected characteristic	Percent (95% confidence interval)	Standard error
Total	46.1 (44.9–47.3)	0.60
Sex		
Men	39.6 (38.0–41.2)	0.82
Women	52.2 (50.7–53.8)	0.76
Age group (years)		
18–29.	44.2 (41.5–47.0)	1.37
30–44.	50.5 (48.6–52.5)	0.99
45–64.	48.9 (47.0–50.8)	0.94
65–74.	44.5 (42.1–46.9)	1.20
75 and older.	29.8 (27.4–32.2)	1.21
Race and Hispanic origin		
American Indian and Alaska Native, non-Hispanic	27.1 (18.8–36.8)	4.35
Asian, non-Hispanic.	52.5 (48.3–56.6)	2.08
Black, non-Hispanic.	38.2 (35.2–41.3)	1.55
White, non-Hispanic	50.7 (49.3–52.2)	0.75
Hispanic.	33.0 (30.4–35.6)	1.31

NOTES: Estimates are based on "yes" responses to the option, "To look up medical test results," when asked the question, "During the past 12 months, have you used the Internet for any of the following reasons?" Adults who did not use the Internet were counted as not looking up medical test results. Adults of Hispanic origin may be of any race. Adults of other and multiple races are not shown. Estimates are based on household interviews of a sample of the U.S. civilian noninstitutionalized population.
