Table XLV. Standard errors for certified nursing assistants currently working in nursing homes who were injured at work in the past year, by type of injury received: United States, 2004–2005

Work-related injuries	Nursing assistants working in nursing homes <sup>1</sup>			
	Number	Percent		
otal <sup>2</sup>	14,271			
njured at work <sup>3,4</sup>	12,537	2.7		
Type of injury				
cratches, open wounds, or cuts	11,366	1.3		
ack injury	7,057	0.9		
lack eyes or other bruising	6,570	0.9		
ther strains or pulled muscles	6,663	1.0		
uman bite	6,282	0.9		
ther injury	4,699	0.7		

<sup>. . .</sup> Category not applicable.

<sup>&</sup>lt;sup>1</sup>Standard errors exclude nursing assistants who terminated employment between the time of the 2004 National Nursing Home Survey and the 2004–2005 National Nursing Assistant Survey (NNAS). Standard errors are for only those certified nursing assistants still employed by the same nursing home at the time of the 2004–2005 NNAS.

<sup>&</sup>lt;sup>2</sup>Includes unknowns.

<sup>&</sup>lt;sup>3</sup>Includes nursing assistants who were hurt or injured one or more times in the past year while at work. Injuries included reporting any of the following: back injuries, including pulled back muscles; other strains or pulled muscles; human bites; scratches, open wounds, or cuts; black eyes or other types of bruising; and other injuries from job.

<sup>&</sup>lt;sup>4</sup>If nursing assistant employed for less than 1 year, includes work-related injuries since nursing assistant began working at the facility.
