Hispanic or Latino ......

<sup>\*</sup> The standard error is not reported when the sample size for the estimate is less than 30, which does not meet the standard of reliability or precision. Standard errors accompanied by an asterisk (\*) indicate that the sample size is between 30 and 59, or the ratio of the standard error to the reported estimate is 30 percent or more.

<sup>&</sup>lt;sup>1</sup>Age at time of interview.

<sup>&</sup>lt;sup>2</sup>Other race includes Asian, Native Hawaiian or other Pacific Islander, American Indian or Alaska Native, and multiple races. Persons of Hispanic origin may be of any race. Starting with data year 1999, race-specific estimates have been tabulated according to the 1997 Standards for Federal Data on Race and Ethnicity and are not strictly comparable with estimates for earlier years. However, only a small number of records had multiple races.
