

**Percent of residential care community (RCC) residents with some or all services paid by Medicaid in the last 30 days, by RCC-level resident age composition and RCC bed size: United States, 2014**

	All RCCs <sup>1</sup>	RCCs where <u>all</u> of their residents are <u>aged 65 and over</u> <sup>1</sup>	RCCs where <u>75% or more</u> of their residents are <u>aged 85 and over</u> <sup>2</sup>
<b>All RCCs</b>	15	8	6
<b>4-25 beds</b>	23	14	10
<b>26-50 beds</b>	17	9	10
<b>More than 50 beds</b>	13	6	5

<sup>1</sup>Significant differences among communities with 4-25 beds, 26-50 beds, and more than 50 beds ( $p < 0.05$ ); decrease by bed size is statistically significant ( $p < 0.05$ ) based on a weighted least-squares regression test.

<sup>2</sup>Significant differences between communities with more than 50 beds and other community sizes ( $p < 0.05$ ).

NOTE: Cases with missing data (3.1%) are excluded.
