NCHHSTP PCSI Activities

Funding and Program Announcements

- Establish FOA standard of practice to ensure adoption of integrated language
- Incorporate PCSI language in FOAs to allow greater flexibility in use of funds
- Inventory FOA opportunities

Program Guidelines / Recommendations

- Issue and roll out integrated partner services guidelines
- Publish recommendations for integrated services to substance users

Surveillance

- Develop and publish an integrated surveillance report
- Establish NCHHSTP confidentiality standards for data-sharing

CDC-Sponsored Training Courses

- Review existing curricula for integration opportunities
- Deliver integrated trainings at CDC and the local level

NCHHSTP Work-Structure

- Establish PCSI meetings at the Division, Program Branch, and project officer level
- Support the MSM, IDU, surveillance, and corrections workgroups

Communications

- Publish White Paper
- Conduct PCSI sessions at national conferences
- Develop interactive web resources for NCHHSTP and partners

PCSI Logic Model

Shorter-Term Grantee Outcomes

- Flexibility to use funds for PCSI within jurisdiction
- Adoption of integrated partner services guidelines within jurisdiction
- Sharing and use of data across disease areas within jurisdiction
- PCSI-related knowledge and skills acquired through NCHHSTPsponsored training programs
- Coordinated communication between grantees and POs across disease areas within jurisdiction
- Understanding of and support for PCSI among grantees

Longer-Term Grantee Outcomes

- Program collaboration across disease areas within jurisdiction
- Service integration across disease areas at point of service delivery

Shorter-Term NCHHSTP Outcomes

- Routine integration of PCSI language in FOAs
- Project officers collaborate across divisions to monitor overlapping grantee activities
- Divisions share and use data across disease areas
- Divisions communicate and collaborate on PCSI

Longer-Term NCHHSTP Outcomes

 Institutionalization of PCSI in the day-to-day operations of NCHHSTP

^{*} Many of these shorter-term outcomes are derived from the list of PCSI barriers, Table 5, Green Paper, July 2007
