

Epidemiology Competency Assessment Form — Tier 3b Epidemiologist

Individuals — Use this form to evaluate your level of understanding and ability to perform each of the following competencies.

Organizations — Use this form to evaluate epidemiologic competence of current staff members.

Training and Competency:
 1 = Awareness: You have no training or experience.
 2 = Basic: You have received basic training.
 3 = Intermediate: You have repeated successful experiences.
 4 = Advanced: You can perform the actions associated with this skill without assistance.
 5 = Expert: You are known inside or outside the organization as an expert.

Importance:
 1 = An important competency for my position
 2 = Neutral
 3 = Not an important competency for my position

Frequency:
 D = Daily
 W = Weekly
 M = Monthly
 R = Rarely
 A = As needed

Skill Domain	Epidemiology Competency: The competency statements below are abbreviated from the comprehensive competency statements in the AEC document	1	2	3	4	5	Importance	Frequency
1, A	Validate identification of public health problems pertinent to the population							
1, B	Organize surveillance							
1, C	Design investigation of acute and chronic conditions or other adverse outcomes in the population							
1, D	Synthesize principles of good ethical/legal practice for application to study design and data collection, dissemination, and use							
1, E	Manage data from surveillance, investigations, or other sources							
1, F	Evaluate data from an epidemiologic investigation or study							
1, G	Evaluate results of data analysis and interpret conclusions							
1, H	Formulate new interventions on the basis of evidence, when available, and control measures in response to epidemiologic findings							
1, I	Evaluate programs							
2	Use basic public health sciences in epidemiologic practice							
2, A-2	Ensure application of understanding of human and environmental biology and behavioral sciences and principles to determine biological mechanisms of disease							
2, B	Develop processes for using laboratory resources to support epidemiologic activities							
2, C	Apply principles of informatics, including data collection, processing, and analysis, in support of epidemiologic practice							
3, A	Organize preparation of written and oral presentations that communicate necessary information to professional audiences, policymakers, and the general public
