

Quality Control of Registry Data Casefinding Exercise—Answers

	Path ID #	Primary Site	Diagnosis and Comments
1.	N-07-04526	Thyroid	Papillary carcinoma
2.	N-07-04530	Frontal lobe, brain	Glioblastoma multiforme
3.	N-07-04538	Lung, right lower lobe	Small cell carcinoma, combined type
4.	N-07-04547	Breast, left	Ductal carcinoma in situ
5.	N-07-04553	Mediastinum	Hodgkin's disease, nodular sclerosing
6.	N-07-04566	Bladder	Non-invasive low grade papillary carcinoma Note: Patient has history of bladder cancer. Review registry patient master file to see if patient has been accessioned previously. If not, review record to determine whether case is reportable according to state reporting rules.
7.	N-07-04575	Sinonasal turbinate	Squamous cell carcinoma in situ
8.	N-07-04580	Colon	Adenocarcinoma (two separate carcinomas) Note: Determine according to multiple primary rules whether these two tumors are one or two primaries and abstract accordingly.
9.	N-07-04587	Prostate	Adenocarcinoma
10.	N-07-04589	Lung	Adenocarcinoma metastatic to liver
11.	N-07-04590	Breast, right	Invasive duct carcinoma
12.	N-07-04593	Colon	History of colon cancer Note: Review registry patient master file to see if patient has been accessioned previously. If not, review record to determine whether case is reportable according to state reporting rules.
13.	N-07-04596	Uterus	Previous diagnosis of adenocarcinoma vs. adenosarcoma
14.	N-07-04599	Colon or rectum	Adenocarcinoma metastatic to liver

- | | | | |
|-----|------------|------------------------------------|--|
| 15. | N-07-04600 | Breast, right upper outer quadrant | Invasive ductal carcinoma |
| 16. | N-07-04602 | Lung, left upper lobe | Adenosquamous carcinoma
Note: Clinical information also lists cancer right upper lobe, left lower lobe, carcinoma of vocal cords, right upper lobe adenocarcinoma, left lower lobe nodule nodule with squamous carcinoma. Review medical record for multiple primaries. |
| 17. | N-07-04603 | Small intestine | Adenocarcinoma in situ |
| 18. | N-07-04604 | Rectum | History of rectal cancer
Note: Review registry patient master file to see if patient has been accessioned previously. If not, review record to determine whether case is reportable according to state reporting rules. |

OTHER CASES

- | | | |
|------------|-------------|--|
| N-07-04525 | Endometrium | <i>Suspicious for</i> adenocarcinoma in situ
Note: diagnostic ambiguous term—reportable as stated. |
| N-07-04601 | Kidney | Oncocytoma
Note: this is a benign tumor—not reportable. |
| N-07-B9310 | Bone marrow | Rule out CLL
Note: This case might be put on suspense to be checked in 3 months or 6 months for a definite diagnosis. If nothing happens in that time, remove the case from suspense and do not abstract. |
| N-07-B9311 | Bone marrow | Differential diagnosis includes a myelodysplastic process such as chronic myelomonocytic leukemia.
Note: This case might be put on suspense to be checked in 3 months or 6 months for a definite diagnosis. If nothing happens in that time, remove the case from suspense and do not abstract. |
