

The HIV Epidemic and

Palm Beach County, Florida Students

What is the problem?

The 2007 Palm Beach County, Florida Youth Risk Behavior Survey indicates that among high school students:

Sexual Risk Behaviors

- 48% ever had sexual intercourse.
- 6% had sexual intercourse for the first time before age 13 years.
- 14% had sexual intercourse with four or more persons during their life.
- 36% were currently sexually active. (1)
- 32% did not use a condom during last sexual intercourse. (2)

Alcohol and Other Drug Use

- 26% drank alcohol or used drugs before last sexual intercourse. (2)
- 3% used a needle to inject any illegal drug into their body one or more times during their life.

What are the solutions?

Better health education • Supportive policies

What is the status?

The 2008 Palm Beach County, Florida School Health Profiles indicates that among middle schools and high schools:

Health Education

- 49% required students to take two or more health education courses.
- 9% taught 11 key pregnancy, HIV, or STD prevention topics in a required course during grades 6, 7, or 8.
- 100% taught 8 key pregnancy, HIV, or STD prevention topics in a required course during grades 9, 10, 11, or 12.
- 0% taught 3 key topics related to condom use in a required course during grades 9, 10, 11, or 12.
- 46% taught how to access valid and reliable health information, products, or services related to HIV, other STDs, and pregnancy in a required course.
- 100% had a lead health education teacher who received professional development during the two years before the survey on HIV prevention.

Supportive Policies

- — had policies on students or staff who have HIV infection or AIDS that addressed attendance of students with HIV infection, procedures to protect HIV-infected students and staff from discrimination, and maintaining confidentiality of HIV-infected students and staff.
- — had a gay/straight alliance or similar club.

1. Had sexual intercourse with at least one person during the 3 months before the survey.
 2. Among students who were currently sexually active.
- Data not available.
