## 2022 School Health Profiles Data User's Guide

---

### I. Data Cleaning and Editing

This section describes the data cleaning and editing procedures for principal and lead health education teacher raw data sets.

After the questionnaires are scanned, Profiles data are edited to account for missing data and to enforce logical consistency among variables. The following sections explain the missing value codes assigned to the data, the logic with which they are assigned, and the consistency checks applied to each of the principal and lead health education teacher data sets.

#### 1. Missing Value Codes

The scanned principal and lead health education teacher Profiles files are all edited using the following missing value codes. The codes are named as such based on SAS naming conventions.

<b>.A</b>	Indicates that the question was correctly skipped.
<b>.B</b>	Indicates that the question should have been skipped but incorrectly contained a response.
<b>.C</b>	Indicates that the question should have been answered but was incorrectly skipped.
<b>.D</b>	Indicates that the question contained invalid data such as more than one response, a stray mark, or some other situation that the scanner could not interpret.
<b>.E</b>	Indicates that it cannot be determined whether a question response should be present or not. This occurs if a previous skip control question is missing for some reason.
<b>.F</b>	Indicates that the question response is logically inconsistent with another question response. Both responses are set to .F.

The missing value codes are assigned based on the logic found in the following sections.

#### 2. Data Edits

##### *a. Principal Questions*

Principal questions are recoded to one of the missing value types according to the following logic:

**Question 4 skips** – If question 4 is ‘b’, question 5 will be recoded to .A if the item was left blank or .B if the item was answered. If question 4 is blank or invalid, question 5 will be recoded to .E.

**Question 24 skips** – If question 24 is ‘b’, questions 25 through 27 will be recoded to .A if the item was left blank or .B if the item was answered. If question 24 is blank or invalid, questions 25 through 27 will be recoded to .E.

## 2022 School Health Profiles Data User's Guide

---

**Question 30 skips** – If question 30 is 'b', question 31 will be recoded to .A if the item was left blank or .B if the item was answered. If question 30 is blank or invalid, question 31 will be recoded to .E.

Next, any remaining blanks are recoded to .C, and any invalid responses (2 or more responses per category) are recoded to .D for all of the questions.

### ***b. Lead Health Education Teacher Questions***

Lead health education teacher questions are recoded to one of the missing value types according to the following logic:

**Question 1 skips** – If question 1 is 'a', question 2 will be recoded to .A if the item was left blank or .B if the item was answered. If question 1 is blank or invalid, question 2 will be recoded to .E.

Next, any remaining blanks are recoded to .C, and any invalid responses (2 or more responses per category) are recoded to .D for all of the questions.

## 2022 School Health Profiles Data User's Guide

---

### 3. Logical Consistency Edits

#### *a. Principal Questions*

After the missing value codes .A-.E are assigned to the principal scanned data, the following **consistency checks (1-2)** are run, changing both responses that cause an inconsistency to .F:

1.	If Q35a = 1 or 2 and	Q35b = 3
2.	If Q35b = 1 or 2 and	Q35a = 3

## 2022 School Health Profiles Data User's Guide

---

### *b. Lead Health Education Teacher Questions*

After the missing value codes .A-.E are assigned to the teacher scanned data, the following **consistency checks (1-219)** are run, checking **all** conditions once, and then afterwards changing both responses that cause an inconsistency to .F. Then, missing value code .E is assigned to question 2 if question 1 was edited by question 6 in consistency check #63 (**213-219**).

1.	If Q2a = 3 and Q2b=3 and Q2c=3 and	Q11a_1 = 1 or 2

## 2022 School Health Profiles Data User's Guide

---

Then, missing value code .E is assigned to question 2 if question 1 was edited by question 6 in consistency check #63 above.

213.	If Q1 = .F and	Q2a = 1 or 2 or 3
214.	If Q1 = .F and	Q2b = 1 or 2 or 3
215.	If Q1 = .F and	Q2c = 1 or 2 or 3
216.	If Q1 = .F and	Q2d = 1 or 2 or 3
217.	If Q1 = .F and	Q2e = 1 or 2 or 3
218.	If Q1 = .F and	Q2f = 1 or 2 or 3
219.	If Q1 = .F and	Q2g = 1 or 2 or 3

Finally, for principal and lead health education teacher data, any valid character data (including 'Not Applicable') is recoded to numeric data (A=1, B=2, and so on).

For both weighted and unweighted sites, the number of records for the dataset will match the number of usable questionnaires reported on the sample description.

Questionnaires are subverted **only** when they contain no data after editing.

## 2022 School Health Profiles Data User's Guide

---

### 4. Grade Span Consistency Edits

Profiles survey results are reported by three school grade levels (middle school, junior/senior high school, high school). Schools are classified into grade level based on the grade span on the sampling frame. Low grade and high grade on the sampling frame are named `f_lowgrade` and `f_higrade`, respectively. Four of the Profiles questions (Principal Q14, Lead Health Education Teacher [LHT] Q2, LHT Q11, and LHT Q12) contain grade-specific responses. These grade questions are compared to the grade span of the school and edited for consistency.

After the edit codes .A-.F have been assigned to the principal and teacher scanned data, Principal Q14, LHT Q2, LHT Q11, and LHT Q12 are edited using the .I edit code to indicate that the responses to these grade questions are inconsistent with the grade span.

#### *a. Principal Question 14*

Each Principal Q14 item (Q14a–Q14g) is checked for consistency. If the item response is inconsistent, that response is recoded to .I. The following consistency checks (1-14) are run.

1. If `f_lowgrade > 6` or `f_higrade < 6` and `Q14a = 1` or `2`
2. If `f_lowgrade <= 6` and `f_higrade => 6` and `Q14a = 3`
3. If `f_lowgrade > 7` or `f_higrade < 7` and `Q14b = 1` or `2`
4. If `f_lowgrade <= 7` and `f_higrade => 7` and `Q14b = 3`
5. If `f_lowgrade > 8` or `f_higrade < 8` and `Q14c = 1` or `2`
6. If `f_lowgrade <= 8` and `f_higrade => 8` and `Q14c = 3`
7. If `f_lowgrade > 9` or `f_higrade < 9` and `Q14d = 1` or `2`
8. If `f_lowgrade <= 9` and `f_higrade => 9` and `Q14d = 3`
9. If `f_lowgrade > 10` or `f_higrade < 10` and `Q14e = 1` or `2`
10. If `f_lowgrade <= 10` and `f_higrade => 10` and `Q14e = 3`
11. If `f_lowgrade > 11` or `f_higrade < 11` and `Q14f = 1` or `2`
12. If `f_lowgrade <= 11` and `f_higrade => 11` and `Q14f = 3`
13. If `f_lowgrade > 12` or `f_higrade < 12` and `Q14g = 1` or `2`
14. If `f_lowgrade <= 12` and `f_higrade => 12` and `Q14g = 3`

#### *b. Lead Health Education Teacher Question 2*

Each Teacher Q2 item (Q2a – Q2g) is checked for consistency. If the item response is inconsistent, that response is recoded to .I. The following consistency checks (1-14) are run.

1. If `f_lowgrade > 6` or `f_higrade < 6` and `Q2a = 1` or `2`
2. If `f_lowgrade <= 6` and `f_higrade => 6` and `Q2a = 3`
3. If `f_lowgrade > 7` or `f_higrade < 7` and `Q2b = 1` or `2`
4. If `f_lowgrade <= 7` and `f_higrade => 7` and `Q2b = 3`
5. If `f_lowgrade > 8` or `f_higrade < 8` and `Q2c = 1` or `2`
6. If `f_lowgrade <= 8` and `f_higrade => 8` and `Q2c = 3`
7. If `f_lowgrade > 9` or `f_higrade < 9` and `Q2d = 1` or `2`
8. If `f_lowgrade <= 9` and `f_higrade => 9` and `Q2d = 3`
9. If `f_lowgrade > 10` or `f_higrade < 10` and `Q2e = 1` or `2`
10. If `f_lowgrade <= 10` and `f_higrade => 10` and `Q2e = 3`
11. If `f_lowgrade > 11` or `f_higrade < 11` and `Q2f = 1` or `2`
12. If `f_lowgrade <= 11` and `f_higrade => 11` and `Q2f = 3`
13. If `f_lowgrade > 12` or `f_higrade < 12` and `Q2g = 1` or `2`
14. If `f_lowgrade <= 12` and `f_higrade => 12` and `Q2g = 3`

## 2022 School Health Profiles Data User's Guide

---

### *c. Lead Health Education Teacher Question 11*

Each Teacher Q11 item (Q11a\_1–Q11v\_1, Q11a\_2–Q11v\_2) is checked for consistency. If the item response is inconsistent, that response is recoded to .I. The following consistency checks (1-88) are run.

1. If f\_lowgrade => 9 and Q11a\_1 = 1 or 2
2. If f\_lowgrade => 9 and Q11b\_1 = 1 or 2
3. If f\_lowgrade => 9 and Q11c\_1 = 1 or 2

26. If f\_higrade => 9 and Q12e\_2 = 3
27. If f\_higrade => 9 and Q12f\_2 = 3
28. If f\_higrade => 9 and Q12g\_2 = 3

## **II. Derived Variable Specifications**

### **1. Principal Standard Variables**

Each standard question can be analyzed as a dichotomous variable. The dichotomous variables present the percentage of principals answering the predetermined response of interest (ROI). Principals answering the ROI are in the numerator. The denominator is either all principals or a subset of principals who have indicated in the current questionnaire that the school meets a certain criterion. Principals must have provided valid data to be included in any dichotomous variable calculations. Principals with missing responses or who had their answers cleaned during consistency editing are not included. The dichotomous variable results are presented in the tables and bar charts in each site's report.

The following table provides the question and response options for each survey variable and the derivation of its dichotomous variable. The numerator and the denominator of the dichotomous variable are defined below the survey variable. The summary text appearing in the title of the tables for each dichotomous variable is also listed. The threshold for reporting frequencies and percentages is provided. The thresholds for reporting depend on whether the survey used a census or a sample of schools, whether the result is reported by grade level category or for all schools, and whether there is a skip pattern that involves the question being processed. When the denominator frequency of the dichotomous variable is less than the threshold, data are suppressed for reporting. The thresholds in the following table pertain to a sample of schools. For a census, there is no threshold for reporting results for all schools; the threshold is 10 for reporting results by grade level category.

<p>Q17. Outside of physical education, do students participate in physical activity in classrooms during the school day?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q17 Denominator: Respondents who answered A or B for Q17 Summary text: Percentage of schools in which students participate in physical activity in classrooms during the school day outside of physical education Variable label: Physical activity in class Threshold: All Schools=55 and By Grade Level=19</p>

**2022 School Health Profiles  
Data User's Guide**

<p>Q18. Not including physical education and classroom physical activity, does your school offer opportunities for all students to be physically active during the school day, such as recess, lunchtime intramural activities, or physical activity clubs?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q18 Denominator: Respondents who answered A or B for Q18 Summary text: Percentage of schools that offer opportunities for all students to be physically active during the school day, such as recess, lunchtime intramural activities, or physical activity clubs Variable label: Offer all opp. to be active Threshold: All Schools=55 and By Grade Level=19</p>
<p>Q19. Does your school offer interscholastic sports to students?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q19 Denominator: Respondents who answered A or B for Q19 Summary text: Percentage of schools that offer interscholastic sports to students Variable label: Offer interscholastic sports Threshold: All Schools=55 and By Grade Level=19</p>
<p>Q20_1. Does your school offer opportunities for students to participate in physical activity before the school day through organized physical activities or access to facilities or equipment for physical activity?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q20_1 Denominator: Respondents who answered A or B for Q20_1 Summary text: Percentage of schools that offer opportunities for students to participate in physical activity before the school day through organized physical activities or access to facilities or equipment for physical activity Variable label: Physical activity before school Threshold: All Schools=55 and By Grade Level=19</p>

**2022 School Health Profiles  
Data User's Guide**

<p>Q20_2. Does your school offer opportunities for students to participate in physical activity after the school day through organized physical activities or access to facilities or equipment for physical activity?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q20_2 Denominator: Respondents who answered A or B for Q20_2 Summary text: Percentage of schools that offer opportunities for students to participate in physical activity after the school day through organized physical activities or access to facilities or equipment for physical activity Variable label: Physical activity after school Threshold: All Schools=55 and By Grade Level=19</p>
<p>Q21_1. A joint use agreement is a formal agreement between a school or school district and another public or private entity to jointly use either school facilities or community facilities to share costs and responsibilities. Does your school, either directly or through the school district, have a joint use agreement for shared use of physical activity or sports facilities?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q21_1 Denominator: Respondents who answered A or B for Q21_1 Summary text: Percentage of schools that have a joint use agreement for shared use of physical activity or sports facilities Variable label: Joint use agreement of physical activity or sports facilities Threshold: All Schools=55 and By Grade Level=19</p>
<p>Q21_2. A joint use agreement is a formal agreement between a school or school district and another public or private entity to jointly use either school facilities or community facilities to share costs and responsibilities. Does your school, either directly or through the school district, have a joint use agreement for shared use of kitchen facilities and equipment?</p> <p>A. Yes B. No</p> <p>Numerator: Respondents who answered A for Q21_2 Denominator: Respondents who answered A or B for Q21_2 Summary text: Percentage of schools that have a joint use agreement for shared use of kitchen facilities and equipment Variable label: Joint use agreement of kitchen facilities and equipment Threshold: All Schools=55 and By Grade Level=19</p>

Q28\_3. When students are caught using electronic vapor products, how often does your school notify parents or guardians?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_3

Denominator: Respondents who answered A, B, C, or D for Q28\_3

Summary text: Percentage of schools that FREQUENCY notify parents or guardians when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never notify parents or guardians when students are caught using electronic vapor products.

Variable label: Notify parents or guardians for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_4. When students are caught using electronic vapor products, how often does your school develop a behavior contract with the student?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_4

Denominator: Respondents who answered A, B, C, or D for Q28\_4

Summary text: Percentage of schools that FREQUENCY develop a behavior contract with the student when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never develop a behavior contract with the student when students are caught using electronic vapor products.

Variable label: Develop a behavior contract with the student for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_5. When students are caught using electronic vapor products, how often does your school refer to a school counselor?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_5

Denominator: Respondents who answered A, B, C, or D for Q28\_5

Summary text: Percentage of schools that FREQUENCY refer to a school counselor when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never refer to a school counselor when students are caught using electronic vapor products.

Variable label: Refer to a school counselor for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_6. When students are caught using electronic vapor products, how often does your school refer to a school administrator?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_6

Denominator: Respondents who answered A, B, C, or D for Q28\_6

Summary text: Percentage of schools that FREQUENCY refer to a school administrator when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never refer to a school administrator when students are caught using electronic vapor products.

Variable label: Refer to a school administrator for EVP use

Threshold: All Schools=55 and By Grade Level=19

Data User's Guide**

Q28\_7. When students are caught using electronic vapor products, how often does your school refer to an assistance, education, or cessation program?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_7

Denominator: Respondents who answered A, B, C, or D for Q28\_7

Summary text: Percentage of schools that FREQUENCY refer to an assistance, education, or cessation program when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never refer to an assistance, education, or cessation program when students are caught using electronic vapor products.

Variable label: Refer to an assistance, education, or cessation program for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_8. When students are caught using electronic vapor products, how often does your school refer to legal authorities (e.g., school resource officer)?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_8

Denominator: Respondents who answered A, B, C, or D for Q28\_8

Summary text: Percentage of schools that FREQUENCY refer to legal authorities (e.g., school resource officer) when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never refer to legal authorities (e.g., school resource officer) when students are caught using electronic vapor products.

Variable label: Refer to legal authorities for EVP use

Threshold: All Schools=55 and By Grade Level=19

Data User's Guide**

Q28\_9. When students are caught using electronic vapor products, how often does your school issue an in-school suspension (half day or full day)?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_9

Denominator: Respondents who answered A, B, C, or D for Q28\_9

Summary text: Percentage of schools that FREQUENCY issue an in-school suspension (half day or full day) when students are caught using electronic vapor products. *For example,* (Never). Percentage of schools that never issue an in-school suspension (half day or full day) when students are caught using electronic vapor products.

Variable label: Issue an in-school suspension for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_10. When students are caught using electronic vapor products, how often does your school issue an after-school or weekend detention?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_10

Denominator: Respondents who answered A, B, C, or D for Q28\_10

Summary text: Percentage of schools that FREQUENCY issue an after-school or weekend detention when students are caught using electronic vapor products. *For example,* (Never). Percentage of schools that never issue an after-school or weekend detention when students are caught using electronic vapor products.

Variable label: Issue an after-school or weekend detention for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_11. When students are caught using electronic vapor products, how often does your school issue an out-of-school suspension?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_11

Denominator: Respondents who answered A, B, C, or D for Q28\_11

Summary text: Percentage of schools that FREQUENCY issue an out-of-school suspension when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never issue an out-of-school suspension when students are caught using electronic vapor products.

Variable label: Issue an out-of-school suspension for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q28\_12. When students are caught using electronic vapor products, how often does your school expel from school?

- A. Never
- B. Rarely
- C. Sometimes
- D. Always or almost always

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q28\_12

Denominator: Respondents who answered A, B, C, or D for Q28\_12

Summary text: Percentage of schools that FREQUENCY expel from school when students are caught using electronic vapor products. *For example*, (Never). Percentage of schools that never expel from school when students are caught using electronic vapor products.

Variable label: Expel from school for EVP use

Threshold: All Schools=55 and By Grade Level=19

Q49. During the past two years, have students' families helped develop or implement policies and programs related to school health?

- A. Yes
- B. No

Numerator: Respondents who answered A for Q49

Denominator: Respondents who answered A or B for Q49

Summary text: Percentage of schools in which students' families helped develop or implement policies and programs related to school health during the past two years

Variable label: Families help develop school health policies

Threshold: All Schools=55 and By Grade Level=19

## 2022 School Health Profiles Data User's Guide

### 2. Principal Supplemental Variables

Supplemental variables are calculated based on results from one or more than one question. The following table presents the numerator and the denominator for calculating the supplemental dichotomous variables.

SHS_PM_1807_1	
Numerator:	Respondents who answered A for any of Q39_1, Q39_3, Q39_5, Q39_6, Q39_7, Q39_8, or Q39_10
Denominator:	Respondents who answered A for any of Q39_1, Q39_3, Q39_5, Q39_6, Q39_7, Q39_8, or Q39_10 or who answered B for all of Q39_1, Q39_3, Q39_5, Q39_6, Q39_7, Q39_8, and Q39_10
Summary text:	Percentage of schools that provide sexual health services to students
Variable label:	SHS_PM_1807_1 sexual health services
Dependence:	Depends on Q39_1, Q39_3, Q39_5, Q39_6, Q39_7, Q39_8, and Q39_10
Threshold:	All Schools=55 and By Grade Level=19
SAS code:	if (Q39_1 = 1 or Q39_3 = 1 or Q39_5 = 1 or Q39_6 = 1 or Q39_7 = 1 or Q39_8 = 1 or Q39_10 = 1) then SHS_PM_1807_1 = 1; else if (Q39_1 = 2 and Q39_3 = 2 and Q39_5 = 2 and Q39_6 = 2 and Q39_7 = 2 and Q39_8 = 2 and Q39_10 = 2) then SHS_PM_1807_1 = 2;
SHS_PM_1807_2	
Numerator:	Respondents who answered A for any of Q40_1, Q40_5, Q40_7, Q40_8, Q40_9, Q40_10, or Q40_12
Denominator:	Respondents who answered A for any of Q40_1, Q40_5, Q40_7, Q40_8, Q40_9, Q40_10, or Q40_12 or who answered B for all of Q40_1, Q40_5, Q40_7, Q40_8, Q40_9, Q40_10, and Q40_12
Summary text:	Percentage of schools that provide health service referrals to students
Variable label:	SHS_PM_1807_2 sexual health referrals
Dependence:	Depends on Q40_1, Q40_5, Q40_7, Q40_8, Q40_9, Q40_10, and Q40_12
Threshold:	All Schools=55 and By Grade Level=19
SAS code:	if (Q40_1 = 1 or Q40_5 = 1 or Q40_7 = 1 or Q40_8 = 1 or Q40_9 = 1 or Q40_10 = 1 or Q40_12 = 1) then SHS_PM_1807_2 = 1; else if (Q40_1 = 2 and Q40_5 = 2 and Q40_7 = 2 and Q40_8 = 2 and Q40_9 = 2 and Q40_10 = 2 and Q40_12 = 2) then SHS_PM_1807_2 = 2;

**2022 School Health Profiles  
Data User's Guide**

SHS_PM_1807_3	
Numerator:	Respondents who answered A for all of Q44_1, Q44_2, Q44_3, Q44_4, Q44_5, Q44_6, Q44_7, and Q44_8
Denominator:	Respondents who answered A for all of Q44_1, Q44_2, Q44_3, Q44_4, Q44_5, Q44_6, Q44_7, and Q44_8 or who answered B for any of Q44_1, Q44_2, Q44_3, Q44_4, Q44_5, Q44_6, Q44_7, or Q44_8
Summary text:	Percentage of schools in which any staff received professional development on sexual health services
Variable label:	SHS_PM_1807_3 professional development health services
Dependence:	Depends on Q44_1, Q44_2, Q44_3, Q44_4, Q44_5, Q44_6, Q44_7, and Q44_8
Threshold:	All Schools=55 and By Grade Level=19
SAS code:	if (Q44_1 = 1 and Q44_2 = 1 and Q44_3 = 1 and Q44_4 = 1 and Q44_5 = 1 and Q44_6 = 1 and Q44_7 = 1 and Q44_8 = 1 ) then SHS_PM_1807_3 = 1; else if (Q44_1 = 2 or Q44_2 = 2 or Q44_3 = 2 or Q44_4 = 2 or Q44_5 = 2 or Q44_6 = 2 or Q44_7 = 2 or Q44_8 = 2) then SHS_PM_1807_3 = 2;
PM_1801_1_2	
Numerator:	Respondents who answered B for all of Q31_1-Q31_3, Q31_5, Q31_10, and Q31_11 or who answered B for Q30
Denominator:	Respondents who answered B for all of Q31_1-Q31_3, Q31_5, Q31_10, and Q31_11 or who answered B for Q30 or who answered A for Q30 and for any of Q31_1-Q31_3, Q31_5, Q31_10, or Q31_11
Summary text:	Percentage of schools that do not sell less healthy foods and beverages (soda pop or fruit drinks, sports drinks, baked goods, salty snacks, candy)
Variable label:	PM_1801_1_2 do not sell less healthy food
Dependence:	Depends on Q30, Q31_1-Q31_3, Q31_5, Q31_10, and Q31_11
Threshold:	All Schools=37 and By Grade Level=10
SAS code:	if (Q31_1 = 2 and Q31_2 = 2 and Q31_3 = 2 and Q31_5 = 2 and Q31_10 = 2 and Q31_11 = 2) or Q30 = 2 then PM_1801_1_2 = 1; else if (Q30 = 1 and (Q31_1 = 1 or Q31_2 = 1 or Q31_3 = 1 or Q31_5 = 1 or Q31_10 = 1 or Q31_11 = 1)) then PM_1801_1_2 = 2;
PM_1801_1_2a	
Numerator:	Respondents who answered B for Q30 or who answered B for all of Q31_1-Q31_3, Q31_5, Q31_6, Q31_10, Q31_11, and Q31_12
Denominator:	Respondents who answered B for Q30 or who answered B for all of Q31_1-Q31_3, Q31_5, Q31_6, Q31_10, Q31_11, and Q31_12 or who answered A for Q30 and any of Q31_1-Q31_3, Q31_5, Q31_6, Q31_10, Q31_11, or Q31_12
Summary text:	Percentage of schools that do not sell expanded list of less healthy foods and beverages
Variable label:	PM_1801_1_2a do not sell expanded list of less healthy food
Dependence:	Depends on Q30, Q31_1-Q31_3, Q31_5, Q31_6, Q31_10, Q31_11, and Q31_12

### 3. Lead Health Education Teacher Standard Variables

Each standard question can be analyzed as a dichotomous variable. The dichotomous variables present the percentage of lead health education teachers answering the predetermined response of interest (ROI). Teachers answering the ROI are in the numerator. The denominator is either all teachers or a subset of teachers who have indicated in the current questionnaire that the school meets a certain criterion. Teachers must have provided valid data to be included in any dichotomous variable calculations. Teachers with missing responses or who had their answers cleaned during consistency editing are not included. The dichotomous variable results are presented in the tables and bar charts in each site's report.

The following table provides the question and response options for each survey variable and the derivation of its dichotomous variable. The numerator and the denominator of the dichotomous variable are defined below the survey variable. The summary text appearing in the title of the tables for each dichotomous variable is also listed. The threshold for reporting frequencies and percentages is provided. The thresholds for reporting depend on whether the survey used a census or a sample of schools, whether the result is reported by grade level category or for all schools, and whether there is a skip pattern that involves the question being processed. When the denominator frequency of the dichotomous variable is less than the threshold, data are suppressed for reporting. The thresholds in the following table pertain to a sample of schools. For a census, there is no threshold for reporting results for all schools; the threshold is 10 for reporting results by grade level category.

Q29. Including this school year, how many years of experience do you have teaching health education courses or topics?

- A. 1 year
- B. 2 to 5 years
- C. 6 to 9 years
- D. 10 to 14 years
- E. 15 years or more

Numerator: Depends on the response of interest (ROI). If ROI is A, then the numerator includes respondents who answered A for Q29

Denominator: Respondents who answered A, B, C, D, or E for Q29

Summary text: Percentage of schools in which the lead health education teacher had ROI of experience in teaching health education courses or topics. For example, 1 year. Percentage of schools in which the lead health education teacher had 1 year of experience in teaching health education courses or topics.

Variable label: Years of teaching experience

Threshold: All Schools=55 and By Grade Level=19

## 2022 School Health Profiles Data User's Guide

### 4. Lead Health Education Teacher Supplemental Variables

Supplemental variables are calculated based on results from one or more than one question. The following table presents the numerator and the denominator for calculating the supplemental dichotomous variables.

SHE_PM_1807_1	
Numerator:	Respondents who answered A for at least 11 of Q11_1_1-Q11_1_22 and at least 11 of Q11_2_1-Q11_2_22
Denominator:	Respondents who answered A for at least 11 of Q11_1_1-Q11_1_22 and at least 11 of Q11_2_1-Q11_2_22 or who answered A to less than 11 of Q11_1_1-Q11_1_22 or less than 11 of Q11_2_1-Q11_2_22
Summary text:	<p>Percentage of schools that taught at least 11 of the following 22 topics in each grade span: grades 6, 7, or 8, and grades 9, 10, 11, or 12:</p> <ul style="list-style-type: none"> <li>• How HIV and other STDs are transmitted</li> <li>• Health consequences of HIV, other STDs, and pregnancy</li> <li>• The benefits of being sexually abstinent</li> <li>• How to access valid and reliable health information, products, and services related to HIV, other STD, and pregnancy</li> <li>• The influences of family, peers, media, technology and other factors on sexual risk behaviors</li> <li>• Communication and negotiation skills related to eliminating or reducing risk for HIV, other STDs, and pregnancy</li> <li>• Goal-setting and decision-making skills related to eliminating or reducing risk for HIV, other STDs, and pregnancy</li> <li>• Influencing and supporting others to avoid or reduce sexual risk behaviors</li> <li>• Efficacy of condoms, that is, how well condoms work and do not work</li> <li>• The importance of using condoms consistently and correctly</li> <li>• How to obtain condoms</li> <li>• How to correctly use a condom</li> <li>• Methods of contraception other than condoms</li> <li>• The importance of using a condom at the same time as another form of contraception to prevent both STDs and pregnancy</li> <li>• How to create and sustain healthy and respectful relationships</li> <li>• The importance of limiting the number of sexual partners</li> <li>• Preventive care (such as screenings and immunizations) that is necessary to maintain reproductive and sexual health</li> <li>• How to communicate sexual consent between partners</li> <li>• Recognizing and responding to sexual victimization and violence</li> <li>• Diversity of sexual orientations and gender identities</li> <li>• How gender roles and stereotypes affect goals, decision making, and relationships</li> <li>• The relationship between alcohol and other drug use and sexual risk behaviors</li> </ul>
Variable label:	SHE_PM_1807_1 MS/HS taught at least 11 topics
Dependence:	Depends on Q11_1_1-Q11_1_22 and Q11_2_1-Q11_2_22
Threshold:	All Schools=55 and By Grade Level=19

## 2022 School Health Profiles Data User's Guide

### 5. Combined Principal/Lead Health Education Teacher Supplemental Variables

Supplemental variables SSE\_PM\_1807\_2 and SSE\_PM\_1807\_3 are derived from both principal and lead health education teacher questions. Schools with either a participating principal or a participating lead health education teacher or both are counted as respondents and included in the calculation of these supplemental variables. Using this counting rule, a response rate is calculated for determining whether SSE\_PM\_1807\_2 and SSE\_PM\_1807\_3 are weighted. If the response rate is at least 70%, weighted estimates of SSE\_PM\_1807\_2 and SSE\_PM\_1807\_3 are produced. The following table presents the numerator and the denominator for calculating the supplemental dichotomous variables.

SSE_PM_1807_2	
Numerator:	Respondents who answered A for principal Q9_3 and teacher Q22_4
Denominator:	Respondents who answered A for principal Q9_3 and teacher Q22_4 or who answered B for principal Q9_3 or teacher Q22_4
Summary text:	Percentage of schools in which school staff received professional development to support lesbian, gay, bisexual, and transgender students
Variable label:	SSE_PM_1807_2 PD support LGBT
Dependence:	Depends on principal Q9_3 and teacher Q22_4
Threshold:	All Schools=55 and By Grade Level=19
SAS code:	if PQ9_3 = 1 and TQ22_4 = 1 then SSE_PM_1807_2 = 1; else if PQ9_3 = 2 or TQ22_4 = 2 then SSE_PM_1807_2 = 2;
SSE_PM_1807_3	
Numerator:	Respondents who answered A for principal Q46_1, Q46_2, Q46_3, Q46_4, and teacher Q19_5
Denominator:	Respondents who answered A for principal Q46_1, Q46_2, Q46_3, Q46_4, and teacher Q19_5 or who answered B for principal Q46_1, Q46_2, Q46_3, Q46_4, or teacher Q19_5
Summary text:	Percentage of schools that performed all of the following activities to communicate with parents and families: <ul style="list-style-type: none"> <li>• Provided parents with information to support parent-adolescent communication specifically about sex</li> <li>• Provided parents with information to support parent-adolescent communication about topics other than sex</li> <li>• Provided parents with information about how to monitor their teen (e.g., setting parental expectations, keeping track of their teen, responding when their teen breaks the rules)</li> <li>• Provided parents with information to support one-on-one time between adolescents and their health care providers</li> <li>• Provided parents with health information designed to increase parent and family knowledge of HIV, other STD, or pregnancy prevention</li> </ul>
Variable label:	SSE_PM_1807_3 communicate families
Dependence:	Depends on principal Q46_1- Q46_4 and teacher Q19_5
Threshold:	All Schools=55 and By Grade Level=19
SAS code:	if PQ46_1 = 1 and PQ46_2 = 1 and PQ46_3 = 1 and PQ46_4 = 1 and TQ19_5 = 1 then SSE_PM_1807_3 = 1; else if PQ46_1 = 2 or PQ46_2 = 2 or PQ46_3 = 2 or PQ46_4 = 2 or TQ19_5 = 2 then SSE_PM_1807_3 = 2;

### **III. Analysis Software Technical Notes**

#### **1. Software Requirements and Sample Packages**

Profiles uses a systematic equal probability sample design. Statistical software used to analyze Profiles data should account for this design. Although the point estimates will always match, there will be small differences in the confidence intervals as different methods for calculating standard errors are used. Many packages with this capability for calculating standard errors are available (SUDAAN, SAS, STATA, SPSS, and Epi Info).

For Profiles, a finite population correction factor (*fpc*) is applied to the standard error of the proportion. The *fpc* accounts for sampling from a finite population without replacement. The large sample statistical theory and the standard errors of the percentage are based on the assumption that the samples are selected with replacement. However, in practice, samples are selected without replacement from populations that are of a finite size. When using the statistical packages mentioned above, special programming is required to incorporate the *fpc* into the calculation of asymmetric confidence intervals. Sample SAS programs using SAS-callable SUDAAN for calculating standard errors and for computing 95% asymmetric confidence intervals with *fpc* adjustment are provided in Section 3, separately for each survey and sample design (sample, census).

#### **2. How to Use the SAS Format Library**

The SAS format library contains the formats used to make SAS output more readable. Formats are linked to the data so that results are displayed as words (“Yes” or “No”, for instance) instead of numbers (1 or 2). The SAS Profiles data file is designed to use its companion format library. You should download both the data file and the format library if you want to use SAS to analyze Profiles data.

The following example SAS program shows how to use the format library. It assumes that both the data file and the format library have been downloaded to “c:\data”. The libname statement indicates where the data file and the format library are located

```
libname mydata "c:\data"; /* tells SAS where the data are */
options fmtsearch=(mydata.xx2022_formats); /* tells SAS where the formats are (xx is the site
code as it appears on the file name on the Survey TA website) */
proc freq data=mydata.xxt2022;
tables q3;
run;
```

Using the format library is recommended but technically is optional. If you do not want to use the format library, include the following statement at the start of your SAS program:

```
options nofmterr; /* tells SAS not to look for formats */
```

## 2022 School Health Profiles Data User's Guide

---

Please note that each year of Profiles data has its own format library. Format libraries are not the same across years of data.

For further information on using format libraries, please consult your SAS documentation.

## 2022 School Health Profiles Data User's Guide

### 3. Example SAS and SAS-callable SUDAAN Program

#### a. Principal Program for a Sample

The following SAS program can be found under Profiles Report Resources and Documentation on the Survey TA website. The name of the file is "2022 Example Principal Program\_Sample.sas."

\* Assign the locations for the SAS data and format library;

```
libname pdata "c:\profiles2022"; /* tells SAS where the data are */
libname library "c:\profiles2022"; /* tells SAS where the format library is */
```
