

Profiles 2010 - Chronic Disease Prevention

Guam Secondary Schools

The **School Health Profiles (Profiles)** is a system of surveys assessing school health policies and practices in states, territories, and large urban school districts. Profiles surveys are conducted biennially among representative samples of middle and high school principals and lead health education teachers.

Physical Education and Physical Activity	Among Territories*		Guam %
	Median	Range	
Percentage of schools in which students could not be exempted from taking required physical education for enrollment in other courses, high physical fitness competency test score, and participation in school or community sports, other school activities, vocational training, or community service activities	66.7	(34.6 – 100.0)	66.7
Percentage of schools that taught 12 key physical activity topics in a required course	60.1	(54.5 – 66.7)	66.7
Percentage of schools that taught about developing an individualized physical activity plan in a required course	83.2	(81.8 – 100.0)	81.8
Percentage of schools in which those who teach physical education were provided with key materials for teaching physical education	87.5	(64.9 – 100.0)	69.2
Percentage of schools that offered opportunities for all students to participate in intramural activities or physical activity clubs	92.3	(74.5 – 100.0)	100.0
Percentage of schools in which children or adolescents use the school's indoor physical activity or athletic facilities for community-sponsored physical activity classes or lessons	73.2	(9.1 – 100.0)	100.0
Percentage of schools that provided parents and families with health information to increase parent and family knowledge of physical activity	52.3	(30.8 – 69.2)	30.8
Nutrition			
Percentage of schools that did not sell less nutritious foods and beverages (baked goods that are not low in fat, salty snacks that are not low in fat, candy, soda pop or fruit drinks that are not 100% juice, and sports drinks) anywhere outside the school food service program	50.0	(36.4 – 100.0)	38.5
Percentage of schools that did not sell soda pop or fruit drinks that are not 100% juice in vending machines or at the school store, canteen, or snack bar	92.3	(45.5 – 100.0)	92.3
Percentage of schools that did not sell sports drinks in vending machines or at the school store, canteen, or snack bar	50.0	(36.4 – 100.0)	38.5
Percentage of schools that always offered fruits or non-fried vegetables in vending machines and school stores, canteens, or snack bars, and during celebrations when foods and beverages are offered	12.5	(0.0 – 63.6)	15.4
Percentage of schools that prohibited all forms of advertising and promotion of candy, fast food restaurants, or soft drinks in all locations¶	31.7	(0.0 – 76.9)	76.9
Percentage of schools that used at least 3 different strategies to promote healthy eating	46.2	(15.4 – 71.4)	15.4
Percentage of schools that taught 14 key nutrition and dietary behavior topics in a required health education course	54.2	(45.5 – 64.0)	58.3
Percentage of schools in which the lead health education teacher received professional development during the 2 years before the survey on nutrition and dietary behavior	89.9	(23.1 – 100.0)	23.1

¶ In school buildings; on school grounds, including on the outside of the school building, on playing fields, or other areas of the campus; on school buses or other vehicles used to transport students; and in school publications.

* Among the 4 (for teacher survey) or 5 (for principal survey) participating territories with weighted survey results.
