## Selected Topics Fact Sheet, Profiles 2008

The School Health Profiles (Profiles) is a system of surveys assessing school health policies and programs in states, territories, and large urban school districts. Profiles surveys are conducted biennially among representative samples of middle and high school principals and lead health education teachers.

Health Education	Among Territories*		Palau %
	Median	Range	
Percentage of schools that required students to take two or more health education courses	43.8	(0.0 – 80.0)	<b>33.3</b>
Among schools that required a health education course, percentage that required students who fail the course to repeat it	47.8	(0.0 – 100.0)	<b>0.0</b>
Percentage of schools with a health education curriculum that addresses all 8 national standards for health education	85.7	(63.6 – 100.0)	<b>100.0</b>
Percentage of schools in which the lead health education teacher had professional preparation in health education or in health and physical education combined	50.0	(33.3 – 80.0)	<b>33.3</b>
Percentage of schools in which all staff who teach health education were certified, licensed, or endorsed by the state in health education	27.2	(0.0 – 72.7)	<b>0.0</b>
Percentage of schools in which those who teach health education were provided with key materials for teaching health education	46.2	(33.3 – 83.3)	<b>83.3</b>
Percentage of schools that provided parents and families with health information to increase parent and family knowledge of tobacco-use prevention, physical activity, or nutrition and healthy eating	69.1	(45.5 – 72.0)	<b>71.4</b>
<b>HIV, STD, and Pregnancy Prevention</b>			
Percentage of schools that taught 11 key HIV, STD, or pregnancy prevention topics in a required course during grades 6, 7, or 8	76.4	(42.9 – 83.3)	<b>83.3</b>
Percentage of schools that taught 8 key HIV, STD, or pregnancy prevention topics in a required course during grades 9, 10, 11 or 12	100.0	(50.0 – 100.0)	<b>100.0</b>
Percentage of schools that taught 3 key topics related to condom use in a required course during grades 9, 10, 11, or 12	100.0	(50.0 – 100.0)	<b>100.0</b>
Percentage of schools that taught how to access valid and reliable health information, products, or services related to HIV, other STDs, and pregnancy in a required course	100.0	(79.2 – 100.0)	<b>100.0</b>
Percentage of schools in which the lead health education teacher received professional development during the two years before the survey on HIV prevention	89.5	(83.3 – 100.0)	<b>100.0</b>
Percentage of schools with a gay/straight alliance or similar club	30.0	(11.5 – 57.1)	<b>20.0</b>
Percentage of schools with a policy on students or staff who have HIV infection or AIDS that addresses attendance of students with HIV infection, procedures to protect HIV-infected students and staff from discrimination, and maintaining confidentiality of HIV-infected students and staff	25.3	(0.0 – 66.7)	<b>66.7</b>

\* Among the 4 participating territories with weighted survey results.
