

Data and Missed Opportunities for Perinatal HIV Prevention

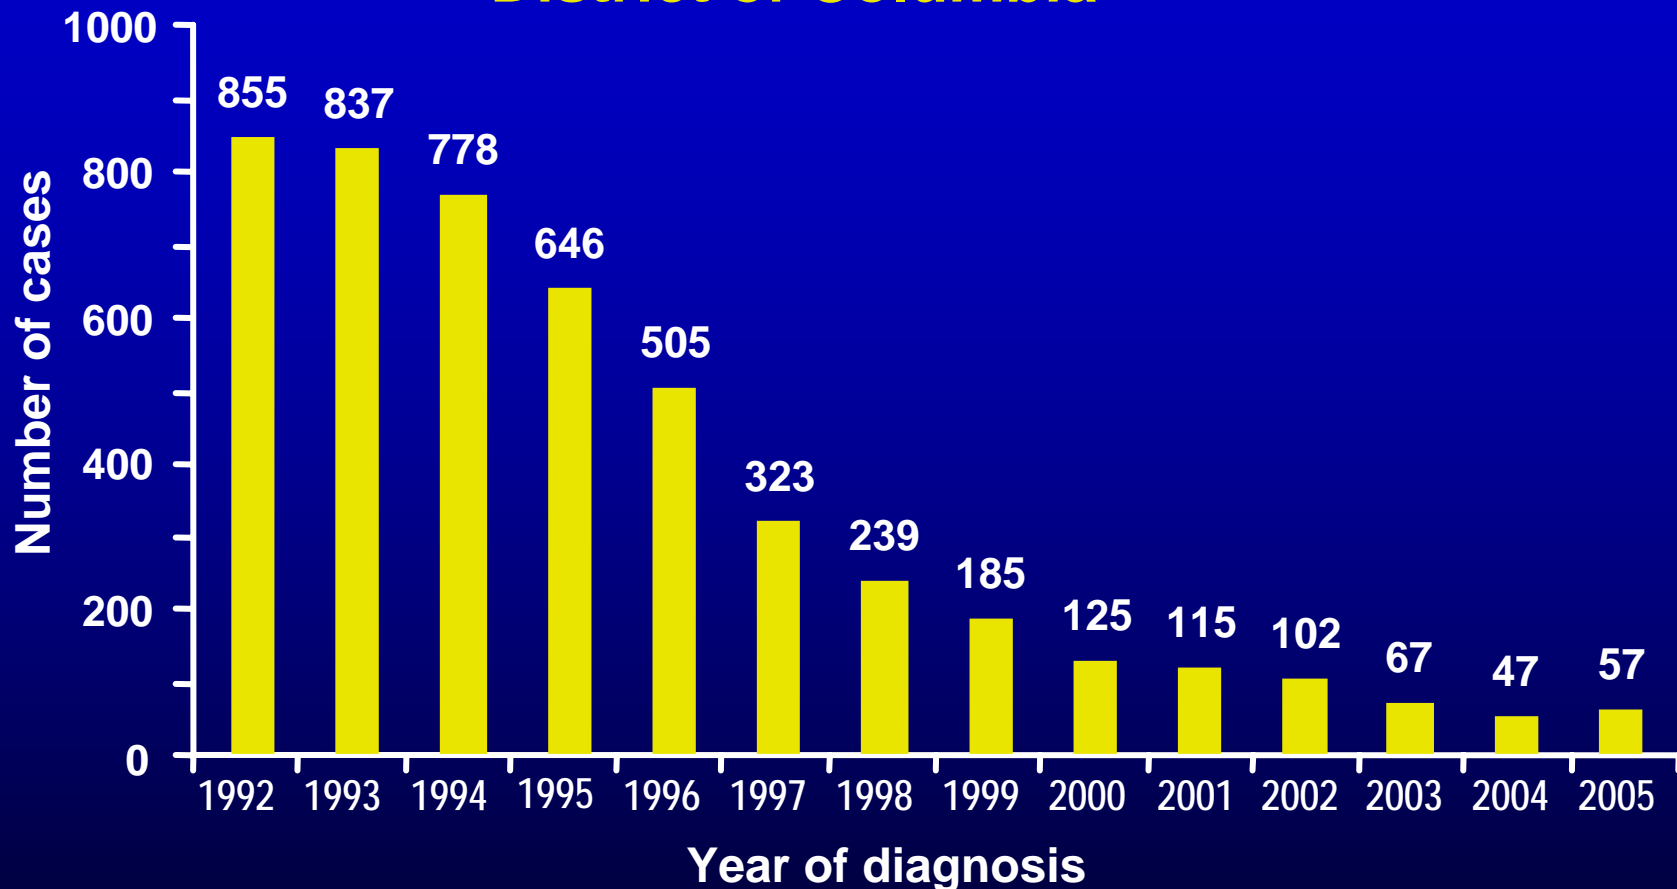

Allan W. Taylor, MD, MPH

May 1, 2007

Perinatal Grantees' Meeting

Estimated numbers of Perinatally Acquired AIDS cases, by year of diagnosis, 1992-2005—50 States and the District of Columbia

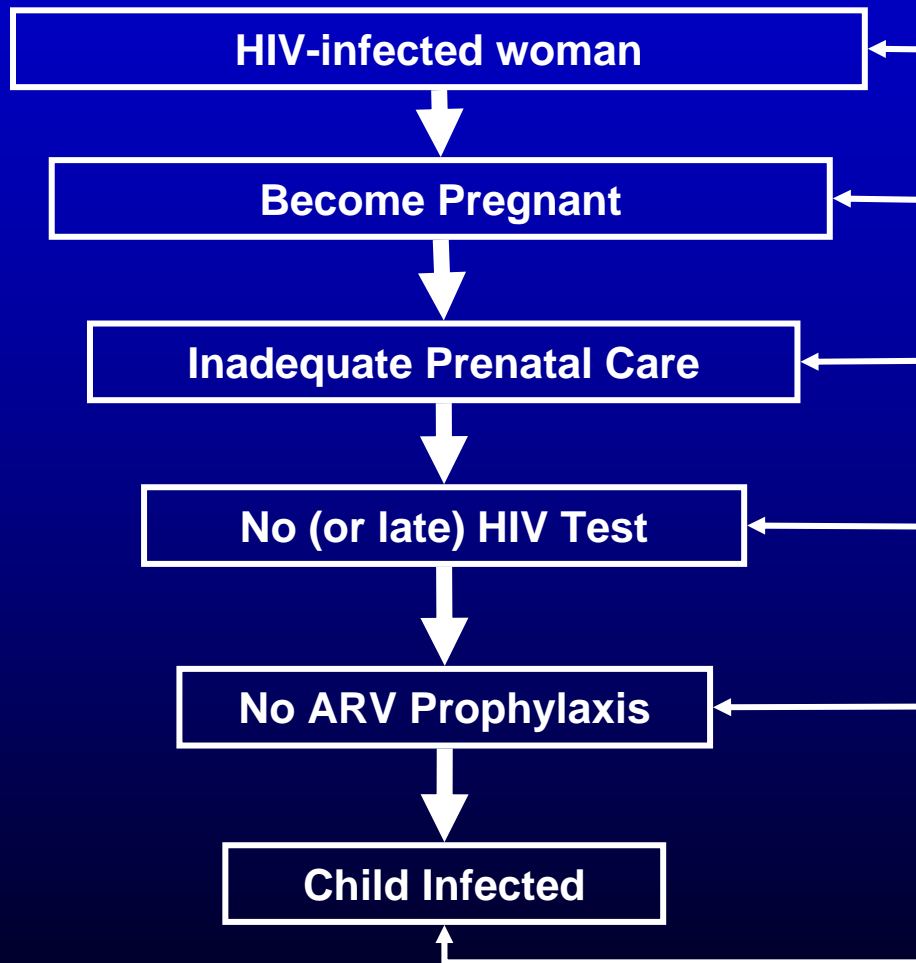

Note. These numbers do not represent reported case counts. Rather, these numbers are point estimates, which result from adjustments of reported case counts. The reported case counts are adjusted for reporting delays. The estimates do not include adjustment for incomplete reporting.
