¹Includes only persons reported with HIV infection who have not developed AIDS.

²See table 3 for areas with confidential HIV infection reporting.

³For HIV infection cases, "risk not reported or identified" refers primarily to persons whose mode of exposure was not reported and who have not been followed up to determine their mode of exposure, and to a smaller number of persons who are not reported with one of the exposures listed above after follow-up. See Technical Notes.

⁴Includes 17 children whose race/ethnicity is unknown.
