

Table 3. Estimated distribution of adults and adolescents with a diagnosis of AIDS within 12 months of diagnosis of HIV infection, by race/ethnicity and sex, 2001—30 areas with confidential name-based HIV infection reporting

Sex	AIDS diagnoses				Total	
	≥12 Months after diagnosis of HIV infection		<12 Months after diagnosis of HIV infection			
	No.	(%) ^a	No.	(%) ^a	No.	(%) ^a
White, not Hispanic						
Male	3,833	58	2,808	42	6,641	100
Female	963	70	406	30	1,369	100
Total	4,796	60	3,214	40	8,010	100
Black, not Hispanic						
Male	4,995	58	3,655	42	8,651	100
Female	3,520	66	1,778	34	5,298	100
Total	8,516	61	5,433	39	13,949	100
Hispanic						
Male	1,281	55	1,046	45	2,327	100
Female	413	63	238	37	651	100
Total	1,694	57	1,284	43	2,978	100
Asian/Pacific Islander						
Male	61	58	44	42	105	100
Female	21	61	14	39	34	100
Total	82	59	57	41	139	100
American Indian/Alaska Native						
Male	58	52	53	48	110	100
Female	16	51	16	49	32	100
Total	74	52	68	48	142	100
Total cases^b	15,360	60	10,076	40	25,436	100

Note. These numbers do not represent actual cases in persons with a diagnosis of AIDS. Rather, these numbers are point estimates of cases diagnosed that have been adjusted for reporting delays. The estimates have not been adjusted for incomplete reporting. Because column totals were calculated independently of the values for the subpopulations, the values in each column may not sum to the column total.

Data include persons in whom AIDS has developed and persons whose first diagnosis of HIV infection and the diagnosis of AIDS were made at the same time.

Since 1998, the following 30 areas have had laws or regulations requiring confidential name-based HIV infection reporting: Alabama, Arkansas, Arizona, Florida, Colorado, Iowa, Idaho, Indiana, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, Nevada, North Carolina, North Dakota, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Utah, Virginia, Wisconsin, West Virginia, Wyoming, and the U.S. Virgin Islands. Since July 1997, Florida has had confidential name-based HIV infection reporting only for new diagnoses.

^a Percentages represent proportions of the total number of diagnoses of HIV infection made during 2001 for the corresponding group (see row entries).

^b Includes persons of unknown race or multiple races and persons of unknown sex.
