

## NEWBORN SCREENING REQUEST PARTICIPATION FORM

NSQAP offers dried-blood spot (DBS) products in two categories: (1) proficiency testing and (2) quality control (QC). The CDC QCs are to be used externally to your kit/primary QCs at periodic intervals. The CDC QCs should not be used as routine daily QCs.

There is no cost for DBS products and shipping. All packages are shipped by FedEx. Any documents, import permits, fees, taxes, or other costs required by your country for release of your package from Customs are your responsibility.

So you can remain in active status and continue to receive products, you must report data for each product that you request.

Please mark the circle **O** to request products.

DBS Proficiency Testing Panels	
<input type="radio"/>	Hormones + Gal (T4, TSH, 17-OHP, TGal)
<input type="radio"/>	Biotinidase Deficiency
<input type="radio"/>	Galactose-1-Phosphate Uridyltransferase Deficiency
<input type="radio"/>	Amino Acids (Phe, Leu, Met, Tyr, Val, Cit)
<input type="radio"/>	Succinylacetone (SUAC)
<input type="radio"/>	Acylcarnitines (C0 [L], C3, C3DC, C4, C5, C5OH, C5DC, C6, C8, C10, C10:1, C14, C14:1, C16)
<input type="radio"/>	<b>Cystic Fibrosis</b> (choose one or both) Immunoreactive Trypsinogen (only IRT)
<input type="radio"/>	Mutations Detection DNA (multiple mutations)

DBS Quality Control Materials	
<input type="radio"/>	Thyroxine – T4
<input type="radio"/>	Thyroid-stimulating Hormone – TSH
<input type="radio"/>	17 alpha-hydroxyprogesterone – 17-OHP
<input type="radio"/>	Total Galactose – Gal
<input type="radio"/>	Amino Acids (Phe, Leu, Met, Tyr, Val, Cit)
<input type="radio"/>	Acylcarnitines (C0 , C2, C3, C4, C5, C5OH, C5DC, C6, C8, C10, C14, C16, C18)
<input type="radio"/>	Immunoreactive Trypsinogen - IRT
