

*Her first tooth!
And she's babbling!*

It's time to change how we view a child's growth.

From birth to 5 years, there are milestones children should reach in terms of how they play, learn, speak, and act. A delay in any of these areas could be a sign of a developmental problem, even autism. Fortunately, the earlier a delay is recognized, the more you can do to help them reach their full potential.

To request a FREE kit, visit www.cdc.gov/actearly.
