LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

All races, female, 35-39 years	prideriioni	a in 2007; no deaths due to J09 were reported in 2007] Cause of death (Based on the Tenth Revision, International Classification of	Percent of total

^{...} Category not applicable

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

^{...} Category not applicable

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

Cause of death (Based on the Tenth Revision, International Classification of Diseases, Second Edition, 2004), race, sex, and age	pridemoni	a in 2007, no deaths due to 309 were reported in 2007]	Percent of

¹ Rank based on number of deaths.

^{*} Figure does not meet standards of reliability or precision

^{...} Category not applicable

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

Cause of death (Based on the Tenth Revision, International Classification of Diseases, Second Edition, 2004), race, sex, and age	pridemonia	a in 2007; no deaths due to J09 were reported in 2007]	Percent of

^{...} Category not applicable

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

Black, both sexes, 75-79 years Support	pridomoni	a in 2007; no deaths due to J09 were reported in 2007] Cause of death (Based on the Tenth Revision, International Classification of		Percent of total

^{...} Category not applicable

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

Cause of death (Based on the Tenth Revision, International Classification of Diseases, Second Edition, 2004), race, sex, and age	pridemoni	a in 2007, no deaths due to 309 were reported in 2007]	Percent of

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

⁻⁻⁻ Data not available

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]

	Cause of death (Based on the Tenth Revision, International Classification of	Percent of total		
Rank ¹	Diseases, Second Edition, 2004), race, sex, and age	Number	deaths	Rate

LCWK1. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in 5-year age groups, by race and sex: United States, 2007

[Rates per 100,000 population in specified group. Rates are not shown for age groups over 85 years because population figures are not available for these age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. New ICD-10 code J09 (Influenza due to identified avian influenza virus) was added to the category Influenza and pnuemonia in 2007; no deaths due to J09 were reported in 2007]
