Morphology [Histology]

Chapter 2 classifies neoplasms primarily by site (topography), with broad groupings for behavior, malignant, in situ, benign, etc. The Table of Neoplasms should be used to identify the correct topography code. In a few cases, such as for malignant melanoma **and certain neuroendocrine tumors**, the morphology (histologic type) is included in the category and codes. To identify the morphology for the majority of Chapter 2 codes that do not include the histologic type, comprehensive separate morphology codes are provided. These morphology codes are derived from ~~the second edition of~~ the International Classification of Diseases for Oncology (ICD-O). ~~The correct morphology code can be found in the Alphabetic Index to Diseases under the main and subterm term for the type of neoplasm, adenocarcinoma, sarcoma, etc.~~

### Y93 Activity code

~~The following category is provided for use to indicate the activity of the injured person at the time the event occurred. It may also be used to describe the activity of a person who suffers from a health condition other than an injury, such as a heart attack or stroke that occurs while engaged in the specified activity. Use in conjunction with place of occurrence code.~~

~~The activity code should be recorded only at the initial encounter for treatment~~

~~Excludes1: — transport accidents (V00-V99)~~

~~The appropriate 7th character is to be added to each code from category Y93~~

~~1 — non-work related activity~~

~~2 — work-related activity~~

~~— activity done for income~~

~~3 — student activity~~

~~— activity performed while a student not for income~~

~~4 — military activity~~

Note: Category Y93 is provided for use to indicate the activity of the person seeking healthcare for an injury or health condition, such as a heart attack while shoveling snow, which resulted from, or was contributed to, by the activity. These codes are appropriate for use for both acute injuries, such as those from chapter 19, and conditions that are due to the long-term, cumulative effects of an activity, such as those from chapter 13. They are also appropriate for use with external cause codes for cause and intent if identifying the activity provides additional information on the event. These codes should be used in conjunction with codes for external cause status (Y99) and place of occurrence (Y92).
