

Blood Pressure/Cholesterol (BPQ) Section (June 2002)

Sample Person Questionnaire

Description

The Blood Pressure/Cholesterol section (prefix BPQ) provides personal interview data on awareness, treatment, and control of high blood pressure and high cholesterol. Questions are asked about lifestyle changes made to treat and/or prevent these conditions.

Eligible Sample and Exclusion Criteria

All participants 16 year of age and older are asked about high blood pressure.
All participants 20 year of age and older are asked about high cholesterol.
