## NHANES Data Documentation

### National Institute of Mental Health

#### Diagnostic Interview Schedule for Children (DISC)

(YDQ)

Years of Coverage: 1999–2004

First Published: October 2006

Last Revised: N/A

---

General documentation for [National Institute of Mental Health Diagnostic Interview Schedule for Children \(DISC\)](#) special access data sets may be found on the Special Access page of the NHANES website.

#### NCHS Locator Fields

**Title:** National Institute of Mental Health Diagnostic Interview Schedule for Children (DISC) (YDQ)

**Contact Number:** 1-866-441-NCHS

**Years of Content:** 1999–2004

**First Published:** October 2006

**Revised:** NA

**Access Constraints:** Only available through the NCHS Research Data Center

**Use Constraints:** Subject to NCHS review

**Geographic Coverage:** National

**Subject:** Youth Mental Health

**Record Source:** NHANES 1999–2004

**Survey Methodology:** NHANES 1999-2000, 2001-2002, 2003–2004 are stratified multistage probability samples of the civilian non-institutionalized population of the U.S.

**Medium:** NHANES Web site; SAS transport files.

]Diagnostic criteria for 300.01 Panic Disorder Without Agoraphobia [
]                                                                    [
]A. Both (1) and (2):                                             [
]                                                                    [
] (1) recurrent unexpected Panic Attacks (see p. 395)           [
]                                                                    [
]     Criteria for Panic Attack                                   [
]                                                                    [
]     Note: A Panic Attack is not a codable disorder. Code the specific [
]     diagnosis in which the Panic Attack occurs (e.g., 300.21 Panic [
]     Disorder With Agoraphobia [p. 402]).                        [
]                                                                    [
]     A discrete period of intense fear or discomfort, in which four [
]     (or more) of the following symptoms developed abruptly and [
]     reached a peak within 10 minutes:                            [
]                                                                    [
]     (1) palpitations, pounding heart, or accelerated heart rate [
]                                                                    [
]     (2) sweating                                                [
]                                                                    [
]     (3) trembling or shaking                                    [
]                                                                    [
]     (4) sensations of shortness of breath or smothering         [
]                                                                    [
]     (5) feeling of choking                                       [
]                                                                    [
]     (6) chest pain or discomfort                                [
]                                                                    [
]     (7) nausea or abdominal distress                            [
]                                                                    [
]     (8) feeling dizzy, unsteady, lightheaded, or faint         [
]                                                                    [
]     (9) derealization (feelings of unreality) or depersonalization [
]         (being detached from oneself)                           [
]     (10) fear of losing control or going crazy                  [
]     (11) fear of dying                                           [
]     (12) paresthesias (numbness or tingling sensations)        [
]     (13) chills or hot flushes                                  [
]                                                                    [
] (2) at least one of the attacks has been followed by 1 month [
]     (or more)of one (or more) of the following:                [
]     (a) persistent concern about having additional attacks     [
]                                                                    [
]     (b) worry about the implications of the attack or its consequences [
]         (e.g., losing control, having a heart attack, "going crazy") [
]                                                                    [
]     (c) a significant change in behavior related to the attacks [
]                                                                    [
]B. Absence of Agoraphobia (see p. 396).                          [
]                                                                    [
]C. The Panic Attacks are not due to the direct physiological effects [
]of a substance (e.g., a drug of abuse, a medication) or a general [
]medical condition (e.g., hyperthyroidism).                       [
]                                                                    [
]D. The Panic Attacks are not better accounted for by another mental [
]disorder, such as Social Phobia (e.g., occurring on exposure to [
]feared social situations), Specific Phobia (e.g., on exposure to a [
]specific phobic situation), Obsessive-Compulsive Disorder (e.g., on [
]exposure to dirt in someone with an obsession about contamination), [
]Posttraumatic Stress Disorder (e.g., in [
]associated with a severe stressor), or Separation Anxiety Disorder [
