NHANES 2003–2004 Data Documentation

Questionnaire Section: Household Interview

Medical Conditions (MCQ_C)

Years of Coverage: 2003–2004

First Published: August 2006

Last Revised: N/A

Component Description

The medical conditions section (prefix MCQ) provides self-reported personal interview data on a broad range of health conditions for both children and adults. Many questions in the NHANES 2003-2004 MCQ section are also contained in previous NHANES surveys allowing researchers to monitor health trends over time. The NHANES MCQ questionnaire segment is generally modeled on the “Medical Conditions” questionnaire section of the U.S. National Health Interview Survey. In accordance with the Department of Health and Human Services’ Survey Integration Plan, a number of questions on health conditions are in fact identical to those used in the redesigned National Health Interview Survey adult and child core sections that started in 1997.

Major Topics in the MCQ Section

Health Conditions / Medical History:

Asthma, Childhood and Adult	Hay Fever
Anemia	Headache
Angina	Heart Attack (Myocardial Infarction)
Attention Deficit Disorder (ADD)	Lead Poisoning Testing
Arthritis (Rheumatoid & Osteoarthritis)	Learning Disability
Blood Transfusions	Liver Disease
Cancer (Multiple Varieties)	Menses Onset
Chronic Bronchitis	Overweight
Congestive Heart Failure	Stroke
Coronary Heart Disease	Stuttering/Stammering
Ear Infections	Thyroid problems
Emphysema	Vision difficulties

Family History of Disease:

Alzheimer’s Disease
Asthma
Diabetes
High Blood Pressure/Stroke
Heart Attack/Angina
Hip Fracture in Mother
Osteoporosis

Questions Regarding Twelve Month Period Prevalence of Disablement:

- Respondent Missed School Because of Illness or Injury (Children)
- Respondent Missed Job Because of Illness or Injury (Adults)

Eligible Sample The target samples for questions in this section vary by age and gender. Please review the questionnaire and codebook carefully. Frequency counts were verified during the preparation of the file.

Interview Setting and Mode of Administration The questions were asked in the household interview. The survey questionnaire can be found at the NHANES website.

Data Processing and Editing The data were reviewed and edited for completeness, consistency, and illogical values.

Analytic Notes A number of additional questions occur in MCQ that are logically related to other questionnaire sections or exam segments. Analysts should refer to these other NHANES sections as a part of any data analysis. Please refer to the Analytic Guidelines on the NHANES website for further details on the use of sample weights and other analytic issues.

Questions Supplementing Other NHANES Questionnaire and Exam Components:

Condition:

Relates to:

Blood Transfusion History	LAB (HIV, Hepatitis Serology, Liver Enzymes)
Prior Lead Poisoning Testing	LAB (Blood Lead)
Menses Onset < Age 12 Years	RHQ
Overweight, Physician Told	WHQ
Trouble Seeing with Current Vision Correction	VIQ & LAB (Visual Acuity Testing)

Changes Since 2001-2002:

The question MCQ.147 in the 2001-2002 questionnaires changed to MCQ.149 in the 2003-2004 questionnaires. When combining the two datasets, this variable should be taken into consideration.
