

**From the Director of the National Center for Health Statistics:**

I am asking for your help with an important study conducted by the Centers for Disease Control and Prevention (CDC) called the National Immunization Survey (NIS). This survey tells us which vaccines people in the U.S. have received and about other important health topics. Results from the NIS are used to help health officials in their efforts to improve health care programs. In the next few weeks, NORC at the University of Chicago will call your household to take part in this study for CDC.

For this study, we need to ask about vaccinations and about children's health. Some households also may be asked questions about the health services their children need or use. If you have a child between 17 and 37 months of age, it would be helpful to have your child's immunization records handy when answering our questions. However, you can also answer these questions without the records.

Your phone number was chosen randomly by computer. It is important for us to interview every household we call to get a complete picture of your area's immunization rates and key factors that might affect them. The study is important, but you do not have to take part, or you can decide not to answer one or more questions.

You may call this toll free number at **1-877-267-8154** if you would like to take part in the study now. You can also call this number to learn more about the study and what you will be asked. For more information, turn this letter over or go to the study's web site: <http://www.cdc.gov/nchs/nis.htm>.

Your answers to the NIS will provide information to help improve the nation's health now and in the years ahead. We need your help to make this study a success. We hope you will decide to take part when we call.

Thank you for your cooperation. I am grateful for your help.

Sincerely,

Charles J. Rothwell
Acting Director, National Center for Health Statistics
Centers for Disease Control and Prevention

What is NORC at the University of Chicago?

NORC at the University of Chicago (NORC) is an independent research organization that conducts interviews on immunizations and children's health for the CDC. Additional information on NORC can be found on its website at <http://www.norc.org>.

NORC Toll Free Number: 1-877-267-8154

You can call the NORC toll free number to take part in the study right away, learn more about the study, and hear what you will be asked.

Who sees my answers?

You will be called by a trained interviewer who enters your answers into a computer. Everyone who works on the survey must sign an oath that promises they will never give out anyone's personal information. Only a few people who work on this survey ever see any personal information. Answers that could identify you or your family in any way are separated from your other answers. Survey findings are put into summary reports that contain no names or other information that identifies you.

How do you protect my information?

Your answers are used for health research purposes only. We conduct this survey under the Public Health Service Act. It and other strict U.S. laws require that we protect your family's information and keep it confidential. If you would like to know more about how we protect your answers, these laws are described in detail at www.cdc.gov/nchs/about/policy/confidentiality.htm.

If you want to know more about your rights as a study participant you may call 1-800-223-8118, toll free. This is the number for the Research Ethics Review Board at CDC. You will be asked to leave a message. Say you are calling about Protocol 2013-01.

How do I find more about immunizations and places to get them?

You may call toll free 1-800-CDC-INFO (1-800-232-4636) for more information about vaccinations or to get the phone number of a doctor or clinic near you.

If you prefer to use a TTY

Please call the AT&T Relay Service at 1-800-855-2880 and request that NORC be called at 1-877-267-8154.
