

National Study of Long-Term Care Providers

National Health Care Surveys

- Your assisted living/residential care community is important to us.
- The most reliable information comes from you.
- Be counted in this ground-breaking study.

National Study of Long-Term Care Providers (NSLTCP)

Adult Day Services · Assisted Living/Residential Care · Home Health Care · Hospice · Nursing Homes

Study goals:

1. Estimate the supply of major types of LTC providers
2. Estimate key policy-relevant characteristics and practices of these LTC providers
3. Estimate the use of these LTC providers
4. Estimate key policy-relevant characteristics of LTC users
5. Produce national and state estimates where possible

Your assisting living or similar residential care community is important to us.

- Participating in NSLTCP is a tremendous opportunity to ensure that the residential care community sector is accurately represented in an on-going study to track trends in the long-term care industry.
- Your participation will help to represent other residential care communities that are similar to yours, and you cannot be replaced.

The major associations that represent assisted living communities encourage you to participate!

Center for Excellence
in Assisted Living

In 2014, CDC's National Center for Health Statistics will conduct the second wave of the National Study of Long-Term Care Providers (NSLTCP), a biennial national study of the major sectors of paid, regulated providers of long-term care services. This data collection effort will include a representative sample of assisted living and similar residential care communities across the country.

National data collection will start in June 2014 and end in December 2014. The Center for Excellence in Assisted Living (CEAL), an organization representing providers, advocates, and other stakeholders in assisted living (see theceal.org) strongly encourages your participation as do the following organizations:

- American Seniors Housing Association (ASHA)
- Assisted Living Federation of America (ALFA)
- LeadingAge
- National Center for Assisted Living/American Health Care Association (NCAL/AHCA)

Residential care directors/executive directors will be asked to complete a questionnaire about their community. The questionnaire will take approximately 30 minutes to complete. NSLTCP will collect information about the characteristics of residential care providers, services offered, staffing; and the demographics, functional status and health of the residents they serve.

The information collected will help policymakers, health care planners, and providers better understand, plan for, and serve the future long-term care needs of the older population and disabled adults.

While results from this survey will be made publicly available, all data will be kept strictly confidential and aggregated, so that the names of the communities, staff, residents and respondents will not be identifiable.

Long-Term Care Providers

National Study of Long-Term Care Providers

2014 Residential Care Community Questionnaire

Dear Administrator or Executive Director,

The Centers for Disease Control and Prevention conducts the National Study of Long-Term Care Providers. Please complete this questionnaire about the residential care community at the location listed below.

- If this residential care community is part of a multi-facility campus or has more than one residential care license, answer only for the place listed below.
- Please consult records and other staff as needed to answer questions.
- If you need assistance or have questions, go to <http://www.cdc.gov/nchs/nsitcp.htm> or call 1-877-225-4434.

Label here

 Residential care places are known by different names in different states. We refer to all of these places and others like them as residential care communities.

Just a few terms used to refer to these places are assisted living, personal care, and adult care homes, facilities, and communities; adult family and board and care homes; adult foster care; homes for the aged; and housing with services establishments.

Thank you for taking the time to complete this questionnaire.

NOTICE – Public reporting burden of this collection of information is estimated to average 30 minutes per response. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road, MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0943).

Assurance of Confidentiality – All information which would permit identification of an individual, a practice, or an establishment will be held confidential, will be used for statistical purposes only by NCHS staff, contractors, and agents only when required and with necessary controls, and will not be disclosed or released to other persons without the consent of the individual or establishment in accordance with section 308(d) of the Public Health Service Act (42 USC 242m) and the Confidential Information Protection and Statistical Efficiency Act (PL-107-347).
