

After the Criteria discussion, participants stayed at the same tables and discussed the Goal Area they selected. One table made up of four participants discussed the Healthy World Objectives.

HEALTHY WORLD

Which objectives are most important to you and your community and why?

- *Generally Applicable:* Objectives 77, access to quality healthcare, and 79, sustainable public health capacity, are important because they apply to all populations. Objective 79 was also seen as the most cross-cutting.
- *Objective 81:* Objective 81, which is related to health among refugee populations, is important in Little Rock because of its growing Hispanic community, as well as immigrants from the Marshall Islands, a U.S. territory.
- *Objective 82:* Objective 82, increase global capacity to control emergent health threats, offers the greatest return on investment of all the Healthy World Objectives.

Are there any big objectives missing from the list?

- *Global Travel:* Participants thought that global travel, a means through which people contract infectious diseases, should be a separate Objective.
- *Human Trafficking:* Health and safety issues related to human trafficking should be included as an Objective.

What is the overall reaction of the group to the objectives for this overarching area taken as a group?

There is some overlap between the Objectives. For example, Objective 82 encompasses Objective 71.

Do the objectives for this overarching area look consistent with the criteria?

The participants felt the objectives were consistent with the criteria.
