

## **Appendix K**

### **Calendar Enclosure**

The calendar is meant to assist mothers in remembering important dates related to the pregnancy and delivery while filling out the questionnaire. Each state is responsible for developing its own calendar for use with mothers. The calendar should include at a minimum the previous two years and present calendar years. Many states choose to also include the next calendar year.

Some states copy an existing calendar to provide to the mothers, while others produce their own printed calendars. States that use Spanish materials may find it helpful to produce a calendar that is printed on one side in English and on the other in Spanish.

#### **Protocol Development Task**

Place your state's calendar here. If your state uses Spanish materials, also include the Spanish calendar here.
