

The World Trade Center (WTC) Health Program Seeks Nominees for the Scientific/Technical Advisory Committee (STAC)

The STAC has 17 member positions and is currently seeking nominations for 5 of these positions in the following categories:

- 1 Environmental medicine or environmental health specialist
- 1 Occupational physician;
- 1 Pulmonary physician;
- 1 Representative of WTC responders;
- 1 Representative of certified-eligible WTC survivors

Membership of the STAC is intentionally varied to bring broad knowledge and perspectives to the Committee for the benefit of the WTC Health Program. Appointments to the STAC may last up to 3 years.

The STAC plays an important role by providing advice of a scientific and/or technical nature to the Administrator of the WTC Health Program. The STAC reviews scientific and medical evidence to make recommendations to the WTC Program Administrator on Program eligibility criteria and additional WTC-related health conditions. The STAC also makes recommendations on research needs for the Program and other matters related to implementation and improvement of the Program at the discretion of the WTC Program Administrator.

Self-nominations are acceptable. Nominations are due by March 31, 2016 and must include the following information:

- The nominee's contact information and current occupation or position;
- The nominee's resume or curriculum vitae;
- The category of membership that the candidate is qualified to represent;
- A summary of the background, experience, and qualifications that demonstrates the nominee's suitability for the membership category;
- Articles or other documents the nominee has authored that indicate the nominee's knowledge and experience; and
- A statement that the nominee is aware of the nomination, is willing to regularly attend and participate in STAC meetings, and has no known conflicts of interest that would preclude membership.

Submit nominations to: nioshdocket@cdc.gov or NIOSH Docket 229-D c/o Mia Wallace, Committee Management Specialist, National Institute for Occupational Safety and Health, Center for Disease Control and Prevention, 1600 Clifton Road, NE., M/S E-20, Atlanta, Georgia 30333
